

## 4D Baby Studio LLC

Diagnostic Ultrasound Services

Compassionate • Accurate • Radiologist-Interpreted

Dear Provider,

My name is Dawn Moncrief, RDMS/RVT, and I'd like to personally welcome you to 4D Baby Studio, a boutique ultrasound practice serving Anthem and North Phoenix. We combine hospital-grade imaging and diagnostic expertise with a calm, patient-centered environment designed for comfort and reassurance.

With over 28 years of diagnostic sonography experience across maternal-fetal medicine, pediatrics, abdominal, vascular, echocardiography, and women's health, I provide both self-referred wellness imaging and physician-ordered diagnostic ultrasound. All diagnostic studies include radiologist interpretation through our partnered reading groups and Medical Director affiliations with Dr. Alysha Vartevan owner of Camelback Radiology Imaging PLLC (Phoenix and Scottsdale, AZ).

Our studio maintains a consistent five-star rating and is recognized by the Better Business Bureau for excellence in service and community trust. I also serve as a First Things First North Region Medical Services Council member, contributing to improved early childhood and maternal health access throughout our region.

### My Professional Credentials

I hold six national registries, including:

- RDMS - Abdominal
- RDMS - Breast
- RDMS - OB/GYN
- RDMS - Pediatric Sonography
- RDMS - Fetal Echocardiography
- RVT - Vascular Specialist
- CVT - Certified Cardiovascular Technologist
- NT - certified

These credentials allow me to deliver exceptionally accurate imaging, clear communication, and a level of clinical confidence unmatched by elective studios and franchise spas.

- Radiologist-interpreted reports delivered directly to your office – add modifier -26 (professional component) or -TC (technical component)

Self-Referred Wellness Imaging- No Doctors order - non diagnostic Radiology report provided to client

- Full-body Ultrasound screening
- Thyroid
- Pelvic and Fertility Follicle Count
- Abdominal
- Vascular
- Peace-of-mind OB reassurance scans, 1st trimester, limited OB scan or growth
- Breast

A wellness screening report includes a limited, non-diagnostic radiology summary for general awareness only.

Screening reports contain general observations only, with no measurements, no medical language, and no clinical interpretation. If something appears unusual, the radiology report will simply recommend that the client follow up with their doctor/provider for a diagnostic exam.

These screenings are intended for:

- Clients who cannot get in to see a doctor for weeks or months
- Individuals seeking peace of mind or personal awareness
- People monitoring general wellness between medical visits
- Clients who want a visual check-in but do not need a full diagnostic workup

Screening ultrasound is a supportive, awareness-based service, not a replacement for diagnostic imaging, mammography, clinical evaluation, or medical consultation.

Elective Ultrasound- Cash pay only- we do not accept HSA/FSA for elective 3D/4D/5D ultrasound services

- 2D gender determination (15-20 weeks)
- 3D/4D/5D & HD imaging
- Bonding sessions
- Keepsake packages

Why Providers Choose 4D Baby Studio

- Hospital-level scanning in a calm, boutique setting
- Six registries ensuring high-accuracy imaging across multiple specialties
- Radiologist-read diagnostic studies
- Fast scheduling with same-day availability in Anthem or Phoenix
- Clear communication and patient-friendly explanations
- North Valley location serving Anthem, Tramonto, Norterra, Desert Hills, and North Phoenix
- Comfortable environment ideal for anxious or high-stress patients
- BBB-recognized business with a 5-star rating on google
- Active member of the First Things First North Region Medical Services Council

Saturday — 10:00 AM to 3:00 PM

Diagnostic reports are interpreted by our radiologist partners and returned promptly to our office within 4-7 business days.

## Operational Policy

4D Baby Studio is a routine diagnostic facility. **We do not perform STAT or emergency studies.** All exams are scheduled as routine appointments. If a significant finding is identified during a study, the sonographer will immediately notify the Medical Director and contact the ordering provider. The patient will then be directed to the nearest hospital or medical service for further evaluation unless the provider specifies otherwise.

4D Baby Studio utilizes Square for secure online booking and payment processing. Patients can schedule appointments at either facility directly through [www.4dbabystudio.com](http://www.4dbabystudio.com). Screening and diagnostic clientele complete their intake and consent forms through Jane App, <https://ultrasound.janeapp.com> our HIPAA-compliant electronic medical record (EMR) system, upon arrival for their appointment. This is where they will receive their study reports and images as well as the superbill if needed.

A **\$25 deposit** is required at the time of booking to secure the appointment if booked online. Deposits are applied toward the total exam cost and are non-refundable for missed or canceled appointments without 24-hour notice.

We provide a superbill through Jane App for reimbursement purposes and process payments via Square for HSA/FSA cards and cash pay. We do not accept insurance at this time. Our exams are affordable, thorough, and patient-centered, designed to deliver hospital-grade imaging in a boutique environment.

### Report Distribution:

Diagnostic ultrasound reports are sent directly to the referring provider for clinical review and follow-up. Self-referred wellness screening reports are delivered to the client via the secure Jane App portal for personal awareness only. These reports are limited, non-diagnostic summaries and do not replace physician evaluation or diagnostic imaging.

**Patient Preparation Guidelines** Arrive 10 minutes early for paperwork.

**Abdominal Ultrasound:** Fast for 6-8 hours prior to exam; sips of water and medication intake permitted.

**Pelvic Ultrasound:** Drink 32 oz of water 1 hour before appointment; do not void until after exam.

**Renal/Bladder Ultrasound:** Drink 24 oz of water 45 minutes before exam; arrive with full bladder.

**Vascular Studies:** No prep required; wear loose-fitting clothing.

**Thyroid/Breast/Small Parts:** No prep required.

**OB Ultrasound:** Drink 32 oz of water 1 hour before appointment; do not void until after exam.

# Thank You

Thank you for taking the time to learn about our studio. I look forward to supporting your patients with compassionate, accurate imaging and seamless communication.

Warm regards,

**Dawn Moncrief, RDMS/RVT**
