

**Pylontech Batteries 2.4 – 10KW Power for your home when the sun goes down**

**Pylon Technologies, Co. Ltd**, founded in October 2009, is the pioneer for LFP (lithium iron phosphate) battery deployed in ESS (energy storage system) and EV (electrical vehicle). With self-developed core technologies in the cathode material, battery cell and BMS (battery management system), **Pylontech** is among the very few companies who have vertically integrated the whole lithium battery industrial chain.

You can stack the 2.4KW modules to cater for your power requirement making **Pylontech** scalable while using a standard 19 inch rack mount foot print. Vertical industry integration ensures more than 4500 cycles with 90% DoD.

If you are considering installing Solar Power on your home or business, make sure you ask about **Pylontech** batteries, you will be surprised at how some good planning will make you more self-sufficient while reducing your electricity bill. **AND** is there an electric in your life or future – we can even help you here!
