TOUCHMENU PARTNERED WITH FOCAL FIRST DIGITAL MENU

Fulfill the potential of your menu.
Become part of the future that is happening now!

INNOVATIVE DIGITAL MENU

NEW, INTERACTIVE CHANNEL FOR COMMUNICATION WITH YOUR CUSTOMERS

INNOVATIVE

Your customers browse the menu and order directly through their smart devices.

DETAILED

Customize orders by adding and removing ingredients, modifiers, and comments. Plus many MORE features!

EFFECTIVE

Optimizes staff effort, saves costs and leaves your customers satisfied.

THE FUTURE ... BECOME A PART OF IT!

In a world where distancing and limited contact is now crucial, there's never been a better time to implement a digital menu. The customer no longer waits, but browses the menu, orders and requests the bill or pays without the intervention of staff. This allows our innovative behavioral analysis algorithm to process the data and make suggestions for arranging, grouping, removing and adding

DEMO MENU

Scan the QR code to view and test the digital demo menu.

To scan the code, use our TouchMenu App, Viber, directly with the iPhone camera or other QR code reader.

WHO IS IT SUITABLE FOR?

TouchMenu is suitable for all types of restaurants - restaurants, pubs, taverns, cafes, discos and clubs, hotels and room service. It is especially effective for all businesses who want to establish themselves as a contactless and digital dining provider.

TOUCHMENU FOR CLEANER ENVIRONMENT!

TouchMenu has the ability to completely or partially replace the paper menus. In this way, you provide your customers with a better alternative, saving costs, time and effort in designing and printing new menus.

WHY TOUCHMENU?

- ✔ Save costs and increase revenue with more orders and ads.
- ✔ Ability to translate the entire menu into an unlimited number of languages.
- ✔ Edit everything in the menu in real time from anywhere in the world.
- ✔ You set promotional products and categories with a period of activity.
- ✔ Promote a contactless environment.
- ✔ Affiliate program for your regular and loyal customers.
- ✔ Elimination of errors in customer-waiter communication.
- ✔ Detailed analysis of customer behavior and optimization recommendations.
- ✔ Integration with Facebook for sharing dishes and promo categories.
- ✔ Customers use their own devices.
