

## SUPERTERMOLI POWERBOATS

MULTI MISSION INTERCEPTOR

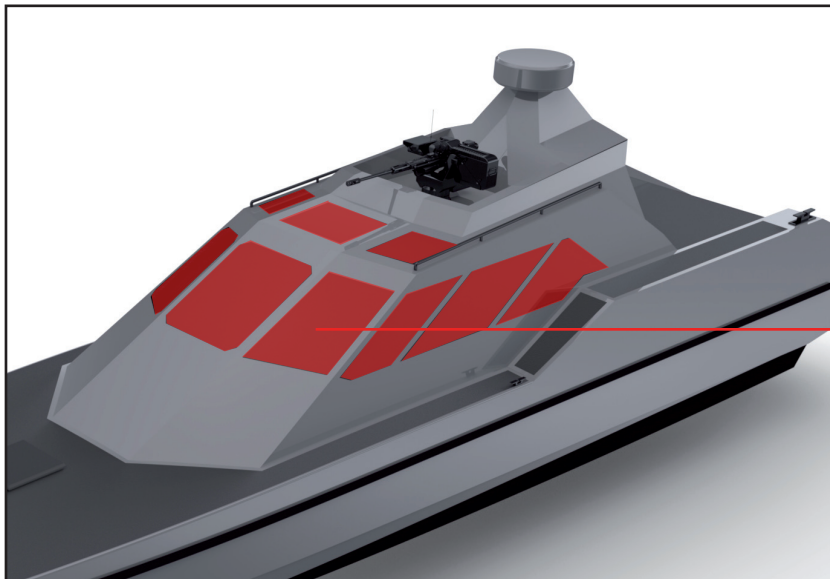

# ST 60

## SPECIFICATIONS

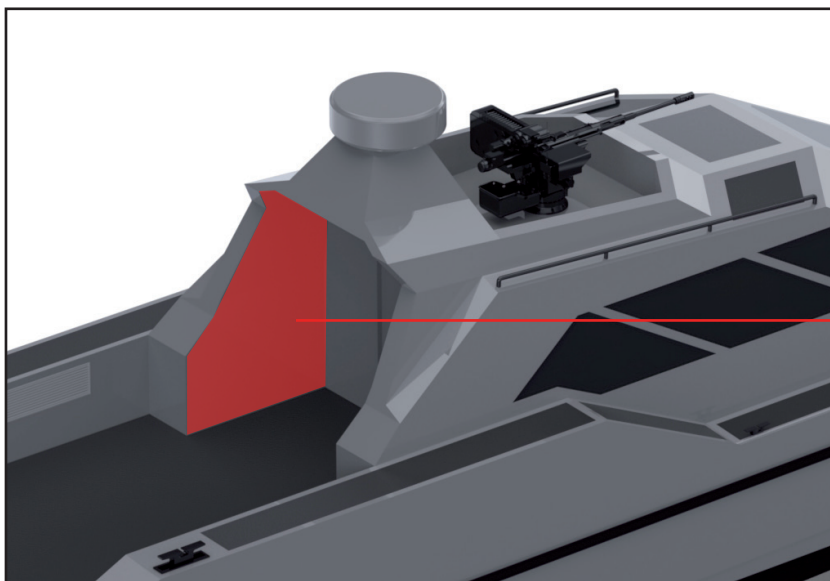

• Length Over All	18,60 m
• Beam Max	3,40 m
• Draft	1,00m
• Height Max	2,80 m
• Displacement when empty approx	18 tons
• Displacement fully loaded approx	24 tons
• Fuel tank capacity up to	4.000 lt
• Fresh water tank capacity	200 lt
• Max speed at 3.000RPM at light conditions	>60 kn
• Range	>400 ml

# ST 60

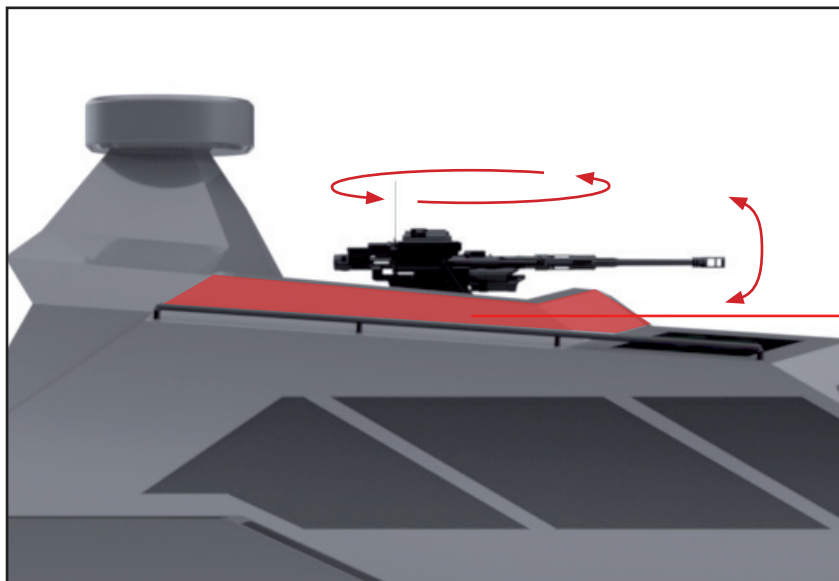

The stealth lines of origin combine very well with the shaped windows which, in addition to having excellent aerodynamics, give great visibility to the outside both laterally and upwards.

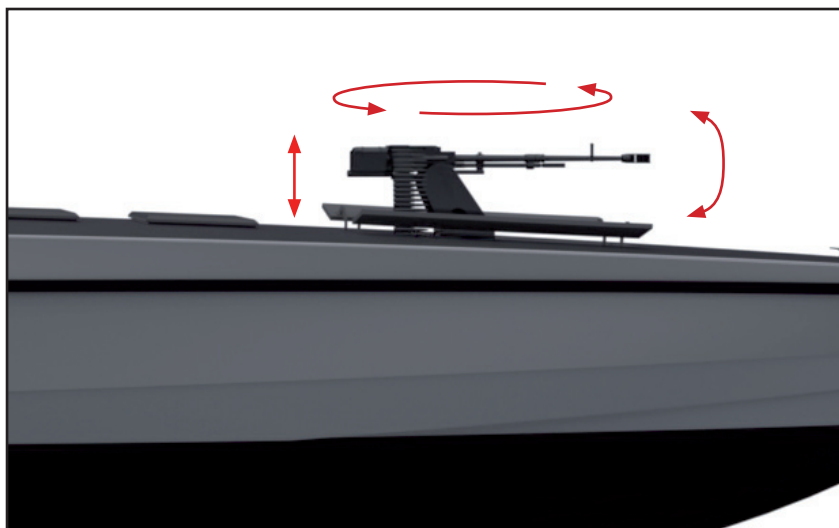

The entrance is protected by the armor that completely envelops it the watertight entrance door

ST 60

The upper machine gun holds a wide angle of rotation, and is protected by a conveyor that in addition to protecting the base of the weapon, also has an aerodynamic function. In the rear, the support for the radar and the various antennas also takes a shape stealth and aerodynamics.

The front machine gun, also with a wide range of rotation, is hidden in its compartment inside the boat and when requested it comes out electrically
