

**SUPERTERMOLI  
POWERBOATS**

SuperTermoli lines of models are high-speed powerboats specifically designed for Special Operations.

The owner of the Supertermoli ST60 and ST50 models loves to feel adrenaline rush even higher than that of the race-track, but reasoned emotions can choose to enjoy safe high speed cruising.

Special seats bring guests at ease to let them experience the thrill of flying at 70 knots (self-limited), a performance comparable to that of a racing car launched over 300 km/h. At anchor or dock it offers the pleasure of a drink in the cockpit or sitting on sofas in the cabin, get a sun-tan with mattresses on the deck at the stern or bow, get in and out the water using the platforms and stairs drawn on the long tail. The sporty design is softened by the sinuous curves that shape the bridge.

The windscreen protects the crew wrapping it like a hug. In the cabin, we can appreciate the pleasure of luxury and a comfortable berth for the night.

They are boats full of Italian technology and represent the state of the art of shipbuilding and mechanical engineering for boating. The hull, engines, transmissions and all technical equipment are produced with advanced technologies. Its boats for high performance and high standards of safety and reliability.

The "JOLLY DRIVE SPECIAL" propulsion system , the flaps operated in real time and the propellers, are all products made by JOLLY DRIVE and represent the highest technological level.

The technologies and expertise Supertermoli have given rise to a vessel comparable to a supercar: tremendously fast, but also able to navigate safely at cruising speeds substantially above the upper limits of many other boats.

Our technologies and know-how deliver a boat comparable to a supercar. Extremely fast and able to navigate safely at cruising speeds above the upper limits of many other boats.

The goal is to give form to a concept and do so with the utmost sophistication, in design and production, to excel in the luxury market and overcome the challenge of technological innovation in the yachting world.

# Supertermoli ST60ss

- The ST60SS is the famous SUPERTERMOLI hulls and interior design by Meelis Press, insuring both quality and durability.
- Life is on demand, so why wait? Cruising at 40 knots, or pushing her past 60, will have you where you want to be in no time at all. Performance is important to us, and we go to great lengths to ensure our products deliver.
- Pushing the throttles to the stops and feeling the boat surge forward with raw power really is an unbeatable feeling. This custom chase tender really delivers in smiles and excitement.
- With angular and aggressive lines, the ST60 SS has a dramatic presence on the water. She turns heads everywhere she goes, the ultimate accessory.
- Escape the hustle and bustle and be yourself, with your own private world at your fingertips. The world is now yours to explore...
- The simple, but elegantly styled interior really is a home form, filled with all the creature comforts you would expect. The master cabin is light and spacious with ample storage for all the essentials.

The day heads & shower room is a real gem, also roomy, the finish is second to none, complete with a mosaic tiled floor.

- DIMENSIONS

- LOA: 18.60m
- Beam: 3.40m
- Draft: 1.00m
- Displacement (t): 22.00t

- **ENGINES (x 2) 1300hp-1500hp**

- Engine Manufacturer: SEATEK
- HP per engine: >1300hp
- Cruising Speed: >40 kn
- Maximum Speed: >60 kn
- Propulsion Type: Jolly Drive Special surface drives

- **TANKS**

- Fuel Tank (L): 3000lt
- Water Tank (L): 400lt

# Supertermoli ST60ss

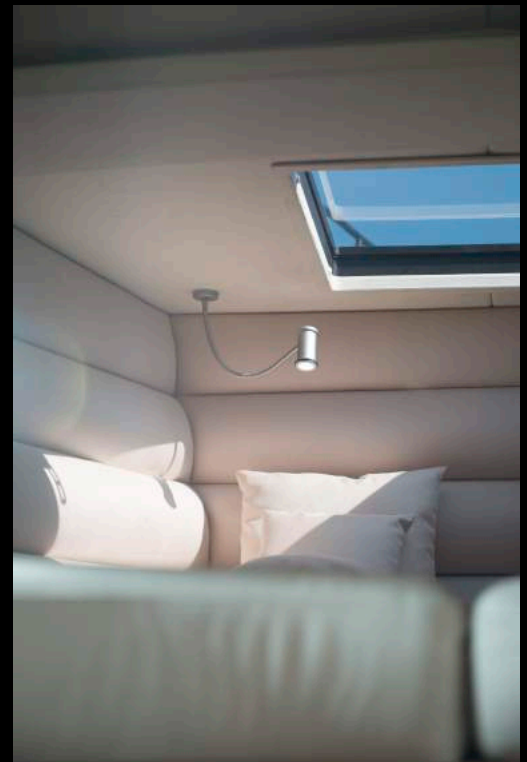

# Supertermoli ST60sport

- The engines we recommend for **ST60sport** 4 x 850hp SEATEK or 2 x 1300hp SEATEK and JOLLY DRIVE Special surface drives
