

# Full Stack Manufacturing CUSTOM CONTROLS & SOFTWARE

Boost OEE with our revolutionary manufacturing software

## Endless Integration

Move data anywhere. Push orders from an MES to your PLC. Capture machine downtime into a historian. Poll APIs.

## No Licenses

Unlimited platform features and usage. No recurring subscription costs. Open for customization.

## Modern Dashboards

Quickly develop dashboards your team will love. Track KPIs, gain insights, and unlock new levels of productivity.

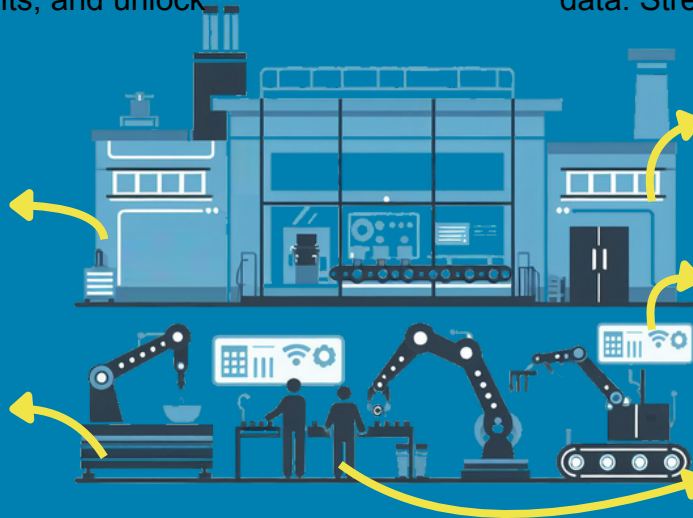

## ETL Pipeline

Aggregate, normalize, and contextualize data. Streamline raw data to refined data.

- Customizable
- Molds to your system

- PLC programming
- Controls upgrades
- Systems integration
- Emergency support

- Rapid deployment
- No licenses
- Quick ROI

- Data collection
- KPI dashboards
- Predictive maintenance

- Dynamic reporting
- Automatic alerts

## Data Collection

Ethernet/IP, Modbus, OPC-UA, MQTT, Files, Historians, APIs, and custom drivers. We can talk to just about anything.

## Manufacturing Apps

Custom applications designed for you. Past examples include an MES, dynamic reports, label printing software, task dashboard, and more.

Harness complete control over your control systems with our open-source software.

## Industrial Controls

PLC/HMI programming, design, and support. Controls upgrades and commissioning. System integrations.

Solve unplanned downtime with our advanced data collection systems.
