**Format:** Monday's round is a four-man team format. The teams will be scored based on their proximity to their cumulative (target) Stableford points relative to other teams.

**Blind Draws:** There are two teams that include a "blind draw". Blind draws are taken from the statistical mode of our participants. Our list of participants have a dual mode – 19 and 22 – so one team will draw from the results of all B19s while the other will draw from the results of all A22s.

**Guest Handicapping:** We have five guests playing with us. We will determine their handicaps and their associated Stableford points based on a modified Peoria handicapping system. Six holes will be randomly selected from Monday's round (2 par-3s, 2 par-4s, and 2 par-5s). Players will not know in advance which holes have been chosen. The results of their scores on those six holes will be generalized to all 18 holes. We will also use the result of those six holes on Monday for Tuesday pairings and for both Tuesday and Wednesday results. Because we don't yet know what the full team points target are for teams that include guests, the target listed shows only the sum of the three member points and a "+" sign indicating that the guests target points will be added once they are determined.

**Randomization:** The pairings shown to the left are the result of a randomization process that targeted a mean of 69.5 cumulative points (and assumed a mean of 17.5 points per guest based on the mean points of our attending members).
