| <p>Methodology for codification:</p> <p>The following methodology was used to categorize HRT0 files reviewed between April 1, 2017 and March 31, 2020 and used in to support the analysis presented in "Does the Ontario Human Rights Tribunal have a Reasonable Prospect of Success?". The HRT0 deals with cases at a summary stage (includes preliminary stage and summary motions) or merit hearing stage. For this analysis, 2,261 cases at summary stage, posted on CanLII under the Human Rights Tribunal of Ontario for the fiscal years 2017-18, 2018-19 and 2019-20 collectively were selected for review. Each case was first identified as being dealt with at a preliminary stage or at a summary motion. Preliminary stage includes cases which were administratively dismissed following a Notice of Intent to Dismiss (NOID), a Failure to Comply with a Case Assessment Directive (CAD) or a direct request for information from a vice chair, or a Failure to attend a scheduled Mediation. Cases for which a summary hearing was scheduled, and the vice-chair attended, were identified as Summary Motions and recorded as Dismissed, Upheld (the case would advance to a merit hearing), Partially Upheld (part of the case was dismissed while part was upheld for further review) or Withdrawn by the applicant. The grounds for dismissals and partially dismissed cases at summary motion were identified as No Reasonable Prospect of Success, Timeliness, Jurisdiction and/or Abuse of Process. Cases where the applicant failed to attend a scheduled summary motion hearing were categorized as Abandoned. The following were excluded from this analysis: merit hearings, cases which were deferred, purely procedural matters, dealt with a Contravention of Settlement, involved a Request to Reactive or reprisal.</p> <p>Reference:</p> <p><a href="http://www.canlii.org/en/on">www.canlii.org/en/on</a> (various dates accessed: 20 July 2020 to September 12, 2021)</p> |                |            |            |                                    |                              |                        |                                  |                                   |            |              |                  |           |  |
