Company Profile

Who We Are

North Oz Solutions was founded in 2024 by a customer-focused leader with deep roots in contract plumbing and supply-chain management and a contract plumbing business owner who both recognised a gap in true end-to-end service delivery across Western Australia.

Today, our 15-strong team of specialist trade sub-contractors deliver expert plumbing, electrical and building-maintenance solutions, while our sister company North Oz Plumbing holds a commanding position in mining-expansion, maintenance, earth works, trenching and repair projects throughout remote WA and is aboriginally owned.

Josh our licensee director holds a vast knowledge of experience in plumbing from managing high rise projects in Sydney to running kilometers of pipe for drainage or water main solutions for remote mine camps, Joe our business director holds multiple qualifications in business management with a passion for safety, communication and customer experience, Josh has previously operated large supply and project teams. Each of our sub-contractors brings an average of 12+ years' hands-on industry experience to every job and follow strict safety guidelines are followed at every job.

North Oz Solutions can offer emergency plumbing works, valve inspection and repairs, RPZD servicing, inspection and replacement along with capital works and procurement solutions, we are also able to offer trenching services, earth moving and pipe laying when required.

We are supported with an in house jobs management system and a local support office to ensure job delivery on time and within budget, we have a collaborative culture with innovation being at the forefront of every task or project we undertake, we have also made a pledge to our teams and customer to ensure safety of our team and customer comes first always.

Underpinning our work is a people-first philosophy — we are looking to invest in apprenticeships and maintain a high staff retention rate. Our clients trust us because we align our commercial outcomes with their strategic goals—whether accelerating mine-site turnaround, minimising retail trading downtime or delivering a project or requirement on time and within budget.
