## **Bicycle Helmet Sticker Kit**

Universal reflective sticker kit fits nearly any bicycle helmet. Create your own design with 3M industrial grade, reflective vinyl.

*Make sure they see you coming!*

Contact us at [info@reflectivedecals.com](mailto:info@reflectivedecals.com)

- 1) Thoroughly clean and dry your helmet using warm soapy water, or window cleaner.
- 2) You can cut the decals apart and tape them in place to help you decide on your design or simply peel and stick.
- 3) Keep in mind this vinyl cannot be peeled away and repositioned. This will stretch the vinyl which could damage its reflective properties as well as shorten the life span of the adhesive. It also leaves ridges and stripes in the vinyl.
- 4) To apply, carefully remove each section from its backing and apply to your helmet, be sure to align the starting edge of the vinyl carefully. Apply each piece from the starting edge to the opposite end.
- 5) Carefully but thoroughly rub each section from the center out to remove any trapped air, ensure full contact with your helmets surface and fully activate the adhesive.
- 6) Once you have finished applying all the desired pieces to your helmet follow up with a dry, lint free clean cloth and give the whole design a good rub down. This should be repeated several times over the next 24 hours.

Thank You for ordering from Applied Graphics. Please visit us at [reflectivedecals.com](http://reflectivedecals.com) for more decals designed to help you be seen and be safe!
