**Identifying Problems.
Developing Solutions.
Sustaining Results.**

CAPABILITY STATEMENT

COMPANY PROFILE

The Lean Eye, LLC utilizes over 20 years of individual/team coaching and 12 years of continuous improvement experience across multiple industries. We offer practical solutions so leaders and their organizations can improve operational efficiency and quality for customers. That means saving money, enhancing services, and developing a culture that employees want to commit to so you are ready for growth. We accomplish this using methodologies such as Lean Six Sigma and change management to eliminate roadblocks, engage your team, and implement sustainable changes. We also explore the use of Artificial Intelligence (AI) to streamline workflows and collect real-world examples to help you keep up with advancing technology. All of our services and tools can be used to support or enhance current programs, EOS, and other frameworks within your organization; or they can be integrated with internal materials, branding, etc. for individualized team / department / enterprise transformation.

CORE COMPETENCIES

- **Process Design & Optimization** – Mapping and analyzing current vs. future state of processes to ensure consistent output and minimize bottlenecks.
- **5S & Rapid Improvement (Kaizen) Workshops** – Intensive problem-solving events (2 days to 4 weeks) that develop countermeasures and establishes a sustainability plan for persistent challenges that impact 1 or more teams.
- **Training & Retaining Organizational Knowledge** – Equip teams with skills to improve daily performance. Reduce gaps in onboarding, offboarding and information resources that disrupt operations during staff changes.
- **Facilitating Strategic Alignment** – Assist leadership with auditing organizational metrics and evaluating operations to ensure workflows do not conflict with goals.

DIFFERENTIATORS

- **Understanding Complex, Integrated Systems** – Risk is assessed across multiple business units and teams to minimize unintended negative impacts.
- **Experience with IT Implementation & AI Utilization** – Avoid roadblocks for new tech solutions using best practices that reduce the expenses of a poor roll-out.
- **Prioritize Listening for Mindful Customization** – We build trust to open communication with stakeholders, analyze their conditions, then adapt the best tools to meet their priorities quickly.
- **Create Consistent Outputs across Multiple Locations** – Review factors such as metrics, training, supply management, and communication methods that create variability and waste for operations.

PAST PERFORMANCE

• Nebraska Children and Families Foundation

Conducted extensive research within Bring Up Nebraska's network to map and document workflows, data collection methods, and systems related to community prevention. Identified efficiencies for IT applications and assisted implementation of a common data system that resulted in 10x increase for operational visibility. Activities included change management, utilization of Lean tools, and coaching for process improvement for 25+ organizations across Nebraska.

Start: JUL 2023

End: FEB 2025

Engagement: \$134,788.19

• Nebraska Sustainable Agricultural Society

Provided executive coaching to the director, who used Lean tools to standardize then document critical processes; develop 7 new programs fulfilling mission goals; and generate \$200,000 for their organization's operations over a 2-year period.

Start: OCT 2023

End: MAY 2025

Engagement: \$12,750

• Union Pacific Railroad

Assisted with the research, evaluation and documentation of transportation processes for a cross-functional team to review this cost category. The project exceeded its savings goal of \$10,000,000.

Start: JAN 2019

End: JAN 2020

Engagement: \$90,000
