

### What Is "Dynamic" 3D Enrichment?

Originally used for canine lure coursing, Wicked Coursing's highly evolved and easy to use systems eclipse anything else available on multiple levels. Quality, elegance of design, versatility of use and application, and exceptional adaptability to all physical planes – horizontal, vertical, multi-level, and under water – create a true "3D" experience for the animals in your care.

"Dynamic" means powerful, active, energetic -- the enrichment ideal for all captive animals, and *exactly* what Wicked Coursing systems offer.

### PORTABLE, ROBUST, EXCITING AESTHETICS – AND OUR SYSTEMS ARE BUILT TO *LAST!*

## Small to Large, Portable to Stationary – We Have Everything You Need for ALL SPECIES

Custom Pulleys and Attachments for All Environments

Maintenance Indicators and Schedules

Small wireless systems

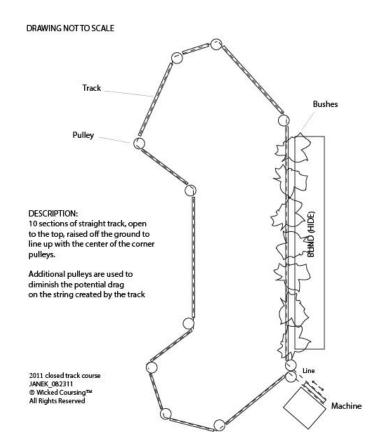

### Why Wicked Coursing?

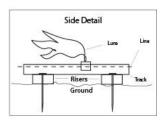

- We take a holistic view of each animal in its environment when we recommend a system
- Our dynamic equipment embraces the three dimensional diversity of predators while building upon their shared needs
- Our goal is to enhance captive living conditions, and diminishing and eliminating many stressors and illnesses that are caused by captivity
- We provide the most comprehensive customer support in the world

### Custom Systems Design To Fit Any Enclosure

Africat in Namibia, South Africa, asked us to develop an enclosed rail system because they didn't want to expose their cheetahs to the line. We created a design with straightaways and curves that realistically simulates a live hunt and provides their cheetahs with a living 3D experience.

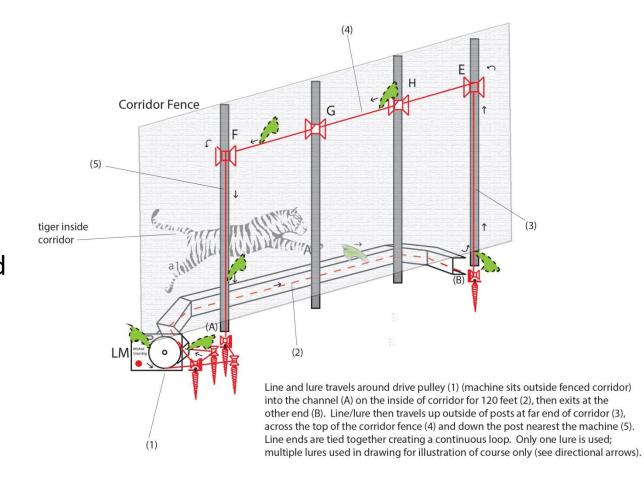

## Let Us Design A System For Any Unique Enclosure or Display Requirements

Oblique and angular use (terraces)

Hybrid: walls, fenceline, trees & ground

Custom
Lures and
Track
Systems

# LET US HELP YOU CREATE TRUE "3D" HUNTING EXPERIENCES AND Extreme Fitness For Healthy Predators

Strategically placed pulleys on trees and other vertical surfaces can be interspersed with horizontal (ground) pulleys to make a realistic and spectacular enrichment experience for the animals. This lure travels both along the ground, up onto vertical surfaces, then down again.

Edible lures can be attached to the line without encouraging "bolting" – ask us!
