NEW CMP RULES AND MATCHES

CMP Competition Rules have undergone major changes in the last few years that were aimed at modernizing the CMP competition program and promoting greater participation in rifle and pistol target shooting. In 2015, two major changes advanced pistol competitions by expanding the types of pistols that

can be used in EIC and National Match Service Pistol events and by introducing the immediately popular CMP 22 Rimfire Pistol Distinguished program. The most significant 2016 change was the authorization for Service Rifle shooters to use optical sights (4.5X max.). 2017 saw the introduction of a new classification system, rules for electronic targets and the addition of rules for “Alternative Rifles” and “Match Rifles.”

The ***CMP Highpower Rifle and Pistol Competition Rules*** govern traditional service rifle and pistol events that take place in EIC or National Trophy Matches.

The biggest change in the 2018 Rules is the introduction of a two-track system for conducting CMP-sanctioned Highpower Rifle Matches. Highpower Rifle events can now be conducted as either traditional “National Trophy Rifle Events” where there are no sighting shots and competitors start rapid-fire series from standing or as “CMP Cup Match Events” where sighting shots are allowed before each stage and competitors start rapid-fire series in position. All EIC Rifle Matches and Camp Perry National Trophy Matches will continue to be conducted according to National Trophy rules, with no sighters and rapid-fire starting from standing. The CMP Cup Matches, which are scheduled at the beginning of the 2018 CMP Highpower Rifle Matches at Camp Perry on 23-25 July, and the CMP Cup Matches, which are included in the 2018 CMP Travel Games programs, will be conducted under Cup Match rules with sighters and rapid-fire stages starting in position.
