

Senior Mechanical Engineer (MUR and/or Healthcare)

Location: Ontario, Canada (Hybrid)

Employment Type: Full-Time

Salary: \$100,000 – \$130,000 CAD

GoodHire Recruitment is excited to share this new opportunity with a **highly regarded, multidisciplinary building services firm with a strong presence in Ontario**. Known for its commitment to technical excellence, collaboration, and impactful design, the company works on complex projects across residential, healthcare, and institutional sectors.

We are looking for a **Senior Mechanical Engineer** who is passionate about delivering high-quality mechanical systems that support meaningful environments—particularly in **multi-unit residential** and/or **healthcare** construction.

About the Role

This position offers a **key leadership opportunity in a high-performing mechanical engineering team**. You'll work across a variety of large-scale, community-impacting projects—ranging from **medical clinics and diagnostic suites to residential towers and long-term care homes**. You'll lead design strategy, mentor peers, and drive innovation in mechanical systems.

Key Responsibilities

- *Review and stamp mechanical design drawings and specifications*
- *Lead design strategy and guide concept development*
- *Conduct audits, feasibility studies, and investigations with detailed reporting*
- *Perform site reviews and manage construction-phase involvement*
- *Contribute to design standards and best practices development*
- *Mentor and support junior and intermediate engineers and designers*

Ideal Candidate

We're looking for someone who brings a high level of expertise and leadership. You should have:

- **7–10 years of mechanical design experience** in building construction
- At least **5 years of work experience in Canada**
- A valid **P.Eng. license in Ontario** (required)
- Strong familiarity with **Ontario Building Code** and **CSA Z317** (for healthcare)
- Hands-on experience with **central plant systems** (hot water, steam, chilled water)
- Working knowledge of **DDC control systems** and operational specifications
- Project experience in **healthcare** and/or **multi-unit residential** buildings
- Strong communication, organization, and mentorship skills
- A collaborative approach and comfort in a **hybrid work** setting

What's In It for You

- **Competitive wages** that recognize your expertise
- A **strong benefits package** to support you and your family
- **Incentive compensation** tied to company performance
- The opportunity to work on essential, high-impact buildings across Ontario
- A culture rooted in integrity, innovation, and continuous learning
- Help you make a difference in the health of people in your community and your country

Apply today through www.goodhirerecruitment.com or email your resume to Info@goodhirerecruitment.com to explore this opportunity confidentially. We're here to help you find the right fit—and make your next career move with confidence.

*Note: When submitting or emailing your resume, use this as subject line: **First Name Last Name - Senior Mechanical Engineer (MUR and/or Healthcare)**.*
