Pie chart, Population data visualization

**Explanation**

A pie chart is a circular statistical graphic divided into slices to illustrate numerical proportions. Since you asked for a pie chart showing the population of Cape Town, we need to clarify what categories or segments you want to compare within Cape Town's population (e.g., by age group, race, gender, etc.). However, since you did not specify, I will assume you want a simple pie chart showing the population distribution by major racial groups, based on the most recent available data (2022 estimates).

**Cape Town Population by Racial Group (approximate, 2022):**

- Black African: 42%
- Coloured: 39%
- White: 16%
- Indian/Asian: 1%
- Other: 2%

**Step-By-Step Solution****Step 1**

Gather the latest population data for Cape Town by racial group.

**Step 2**

Calculate the percentage of each group (already provided above).

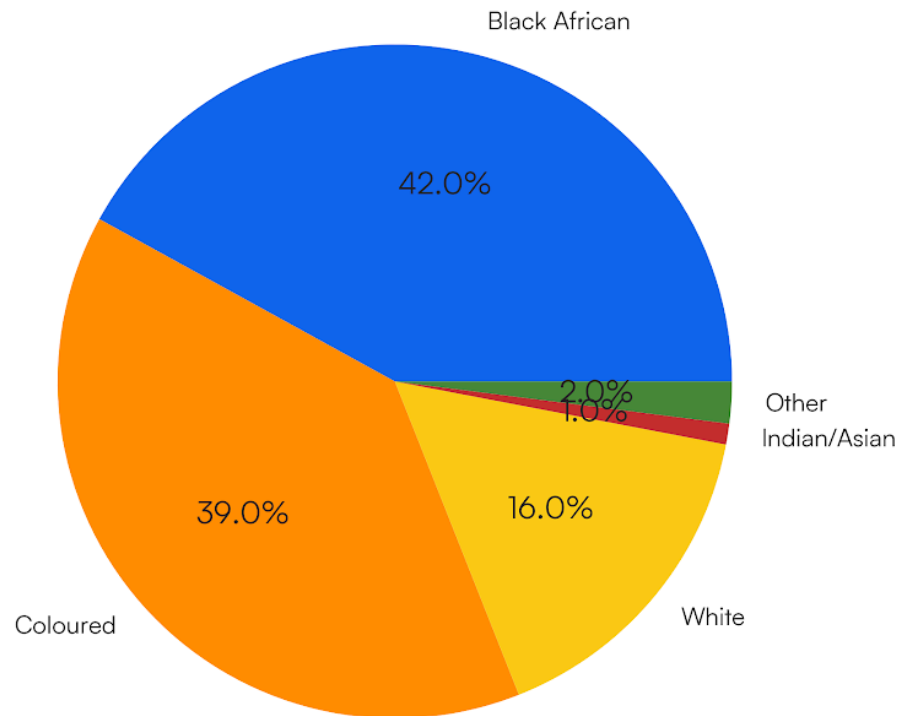

**Step 3**

Prepare the data for the pie chart:

- Black African: 42%
- Coloured: 39%
- White: 16%

**Step 4**

Plot the pie chart using the above data.

**Cape Town Population by Racial Group****Final Answer**

Here is a pie chart showing the population distribution of Cape Town by racial group:
