

INFORMATION ON SEPARATORS

1 . SEPARATORS ARE PLACED TO PUSH THE BACK TEETH APART RELEASING THE CONTACT POINTS BETWEEN THE TEETH TO ENABLE THE PLACEMENT OF THE BANDS WHICH ARE PART OF THE ORTHODONTIC APPLIANCE.

2. THEY WILL FEEL UNCOMFORTABLE WHEN THEY ARE PLACED AND FOR A FEW HOURS AFTERWARDS

3. IT IS IMPORTANT TO KEEP THE SEPARATORS IN PLACE AND NOT EAT STICKY, CHEWY FOODS AND TO BE CAREFUL WHEN BRUSHING THAT THEY ARE NOT DISLODGED.

4. IF A SEPARATOR COMES OUT ONE TO TWO DAY BEFORE YOUR BRACE IS TO BE FITTED THEN IT IS OK TO LEAVE IT. IF IT COMES OUT SEVERAL DAYS BEFORE YOUR APPOINTMENT FOR THE BRACE FITTING THEN YOU NEED TO CALL US AND ARRANGE TO RETURN AND HAVE IT REPLACED.
