## Accusmile®

3 simple steps to a beautiful smile.

### 1. The consultation

You discuss the option of Accusmile® aligner treatment with your orthodontist. They will then either take an impression or digital scan of your teeth, on which your personal three-dimensional treatment plan will be based.

### 2. The aligners

The Accusmile® aligners will be made specifically for your personal treatment plan and given to you by your orthodontist. We recommend that you wear them every day for 20-22 hours.

### 3. The treatment

Your orthodontist will check your progress every 6-8 weeks and give you new aligners.

Ask your orthodontist for further details:

## Accusmile® aligner

### The perfect alternative to braces.

Accusmile® aligners are transparent correction splints made of a translucent special plastic material. The biggest difference to traditional braces is that the aligners are so discreet that they are hardly noticeable. What's more, these innovative splints are very versatile when it comes to which kind of problem they can be used for. No matter whether you want to close a gap or correct crowding or rotation, you will see results very quickly.

The aligners are comfortable to wear because they have a pleasantly smooth surface, and no screws or wires.

**Accusmile®. Unobtrusive. Effective.**  
**For a beautiful smile.**

Discreet and almost invisible

Effective teeth correction in the shortest possible time

Comfortable to wear - the aligners are pleasantly smooth

Removable to clean your teeth

Attractive pricing for smaller, partial corrections

Does not impede your speech

Easily integrated into your lifestyle

Accusmile® aligners  
Made in Germany

Wearing Accusmile® aligners will not disrupt your daily routine. The splints are doing their job discreetly and effectively without inhibiting either your speech or smile. They can be worn comfortably up to 22 hours per day whilst causing only minimal inconvenience. The Accusmile® aligners are easily removed for cleaning, brushing your teeth, and eating. You simply reinsert them afterwards.
