

**ANNOUNCEMENT: January 30, 2019**

## **U.S. Postal Service FCU Selects Fusion CRS™ as its new Consolidated Delinquency Collection and Recovery Software Platform**

We are very pleased to announce that U. S. Postal Service Federal Credit Union, located in Clinton, MD, has selected Fusion CRS™ as its collection and recovery software platform.

USPS FCU is part of a long-standing tradition in personal financial management and has been serving its members since 1934 when it was founded to serve employees of the United States Postal Service. USPS FCU now serves over 24,253 members. Its membership also includes members from several Select Groups (SG).

USPS FCU chose Fusion CRS as a replacement for its currently installed in-house written collections software platform. After an extensive evaluation, USPS FCU selected Fusion CRS primarily for the following reasons: 1) our consolidated, flexible, and very robust software platform capabilities; 2) the ease-of-use of Fusion CRS as compared to other platforms evaluated, allowing USPS FCU collections and recovery team to become proficient with their new platform much sooner; and 3) our outstanding reputation for providing high-quality support and service.

One of the initial steps of our implementation will be to work with the credit union to integrate to its Fiserv DataSafe® core processing platform, along with its third-party mortgage and card processing vendors, in order to provide the Fusion CRS users with a 360-degree view of the member's relationship with the credit union.

We are very excited to have USPS FCU join our growing family of customers!

### **[About Fusion CRS Solutions](#)**

Fusion CRS Solutions enables clients to achieve best-in-class results by driving improvements in revenue and cost reduction through highly advanced, next generation collection and recovery software together with the highest level of professional support services available in the industry.
