EMERGENCY
RESPONSE

At Beacon Rescue our mission is simple, yet vital. We aim to **build resilient and prepared communities** prior to a disaster, **rapidly respond and assist in coordinated rescue efforts** directly after a disaster, and to **help restore hope by assisting in a coordinated non profit effort to rebuild and deliver aid.** We do this by partnering with organizations like yours.

WHAT SETS US APART FOR CORPORATE PARTNERS

+ COORDINATED OPERATIONS FOR MAXIMUM IMPACT

One of the main areas that sets Beacon Rescue apart is its **well coordinated efforts**. Whether these efforts bring awareness and preparations to a community, assist in life saving search and rescue efforts, or deliver aid to help rebuild communities, **we strive to bridge the gap between local, state and/or federal emergency operation centers with various other organizations that help fulfill the mission at hand in a holistic well rounded approach**

+ SPECIALIZED IN AUSTERE AND HARD-TO-REACH AREAS

Former military, special operations and first responder professionals on our team give us the expertise to operate where others can't or won't. Our unique skill set allows us to **quickly assess disaster zones** and ensure conditions are ready for follow-on organizations like Water Mission.

We **specialize in search and rescue, reconnaissance, and communication setup** in the most challenging conditions by taking advantage of cutting edge technology, making us a reliable front-line team.

+ FIRST-IN RESPONSE: LAYING THE GROUNDWORK FOR PARTNERS

In partnerships with organizations such as **Waves for Water**, Beacon Rescue deploys immediately after disasters to **assess the situation and prepare the environment** for other aid agencies to deliver their services effectively.

We don't just work independently—we **pave the way for partners** to arrive safely and efficiently, ensuring their specific aid and skills are maximized missions succeed from the start

+ REAL-TIME NETWORKING FOR LIFE-SAVING SOLUTIONS

Our strength lies in the **networks we've built across multiple relief organizations**. We don't hoard resources or seek credit; instead, we connect the right organizations with the right opportunities. *Example: Through these networks, we coordinated the sourced and delivery of **500 doses of Narcan in just 10 minutes** to support North Carolina clinics in need—showing how quickly and effectively we can mobilize resources.*

+ PHASE 2 RESPONSE: BEYOND IMMEDIATE RESCUE

After completing SAR missions, we transition to **Phase 2 Disaster Response**, where we work with communities, local agencies, and nonprofits on sustainable recovery. Our long-term focus ensures disaster-stricken areas **rebuild stronger and better**.
