

OptiGlimmer

Plastic Lens Polishing Slurry

OptiGlimmer is a compound-type polishing slurry developed especially for plastic lenses. The high-purity alumina is uniformly dispersed in a special solution with pH of about 3.3 to 4.0, delivering excellent polishing performance and a high-quality finished surface. It is available in a wide range of types.

Product	Baume	D50	pH
OptiGlimmer Classic	18-20	2.0-2.7	3.3-3.9
