

CBD (Cannabidiol) Patient Education Guide

- CBD (Cannabidiol) is one of a group of unique chemical compounds that are found only in the cannabis or hemp (cannabis sativa) plant.
- When CBD is activated (smoked, vaped or ingested), it turns on specific receptors that influence body functions such as:
 - Appetite, pain sensation, mood, memory and anxiety.
- CBD does not get you high. In fact, when taken with THC, CBD can actually reduce how high you can get.
- Some of the effects of CBD include:
 - Antiemetic (reduces nausea and vomiting)
 - Anticonvulsant (suppresses seizures)
 - Anti-inflammatory (mitigates inflammatory disorders)
 - Antitumoral (fights tumor and cancer cells)
 - Anxiolytic (Combats anxiety and depression)
 - Antioxidant (tempers neurodegenerative disorders)
 - Antipsychotic (mediates psychotic disorders)
- CBD currently has potential to fight diseases such as:
 - Schizophrenia
 - Psychosis
 - Epileptic disorders
 - Anxiety
 - Depression
 - Cancer
 - Osteoporosis
 - Loss of appetite
 - Nausea
 - Lupus
 - Obsessive-compulsive disorder (OCD)
 - Parkinson's disease
 - Chronic and acute pain
 - Diabetes
 - Neurodegenerative disorders (e.g., Alzheimer's)

NOTICE TO GOVERNMENT AGENCIES:

What is contained here might look like marijuana, but it is actually legal industrial hemp flower grown in compliance with the Agricultural Act of 2014, 7 U.S.C. §5940 (2014 Farm Bill), pursuant to pilot programs lawfully established under Nevada Revised Statutes §557.010, et seq. Nevada's respective Departments of Agriculture have certified, registered, and regulated the growing of our industrial hemp in conformance with federal and state laws, rules, and regulations. TRIM READY INC IS A REGISTERED INDUSTRIAL HEMP HANDLER IN NEVADA WITH THE LICENSE # 201803H & 201804H.

Federal law, in particular, 7 U.S.C. §5940(b)(1), entitled "Legitimacy of Industrial Hemp Research," encourages growing, cultivating, and marketing industrial hemp products pursuant to these pilot programs, and by the rights and protections thereby established, CBDHemp.direct proudly offers this legal industrial hemp flower high in cannabidiol (CBD) in the United States.

According to 7 U.S.C. §5940, the term "industrial hemp" means the plant *Cannabis sativa* L. and any part of such plant, whether growing or not, with a Delta-9 tetrahydrocannabinol (Delta-9 THC) concentration of not more than 0.3% on a dry weight basis. Only the Delta-9 THC level is relevant, not THC-A. As shown by the enclosed Certificate of Analysis, this hemp flower has a Delta-9 THC level on a dry weight basis equal to 0%, well below the 0.3% maximum level and, therefore, this flower is hemp, not marijuana, and is perfectly legal to possess and sell. This right applies in any state pursuant to the Full Faith and Credit Clause, Article VI, Section 1 of the Constitution, the Supremacy Clause, Article VI, Section 2 of the Constitution, and the Equal Protection Clause, Section 1 of the Fourteenth Amendment.
