

THE MOST ADVANCED
MOTION RECOGNITION
TECHNOLOGY

Hard-Realtime Human Activity Recognition

Industry leading **time granularity**

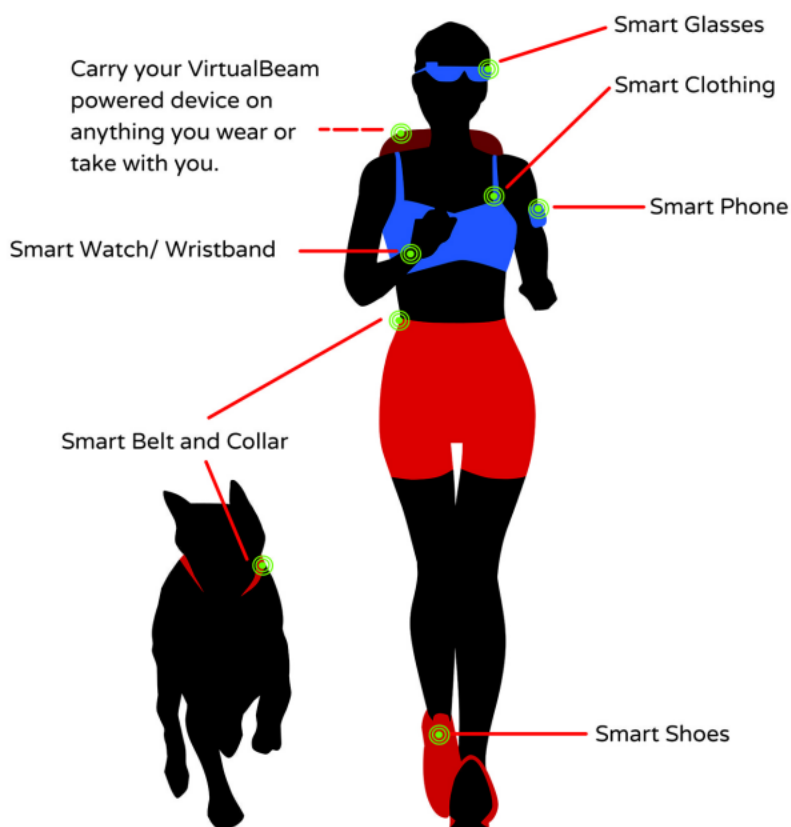

Device agnostic - works on many mobile devices/wearables

Smallest footprint in the market today

Autonomous - on device processing

No backend or **cloud dependency**

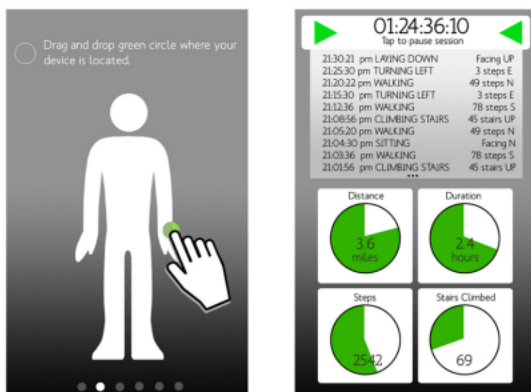

Wear anywhere on your body

COARSE MOTION DETECTION

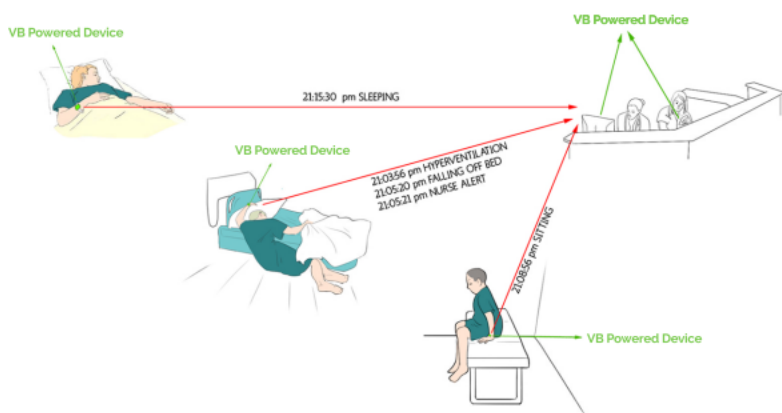

Granular activity recognition; walking, running, cycling, jumping, swimming, sleeping...

FINE MOTION DETECTION

Recognizes and responds to the finest and most subtle movements of the body.

IN-CLINIC PATIENT MONITORING

Real-time and precise detection of motion allows the immediate alert to responsible personnel (hospital, emergency staff...)
