MODERN Motion

Calma

Comfort, elevated for everyday living.

The Calma is a fully powered rise and recline chair designed to deliver exceptional comfort, support and ease of use. Combining triple-motor operation, a 360° swivel base and Zero Gravity positioning, it enables users to find their preferred seating position while providing smooth assistance when sitting down or standing up.

An articulated headrest, independently adjustable footrest and generously padded armrests create a personalised seating experience, while the intuitive four-button control panel allows each function to be operated with ease.

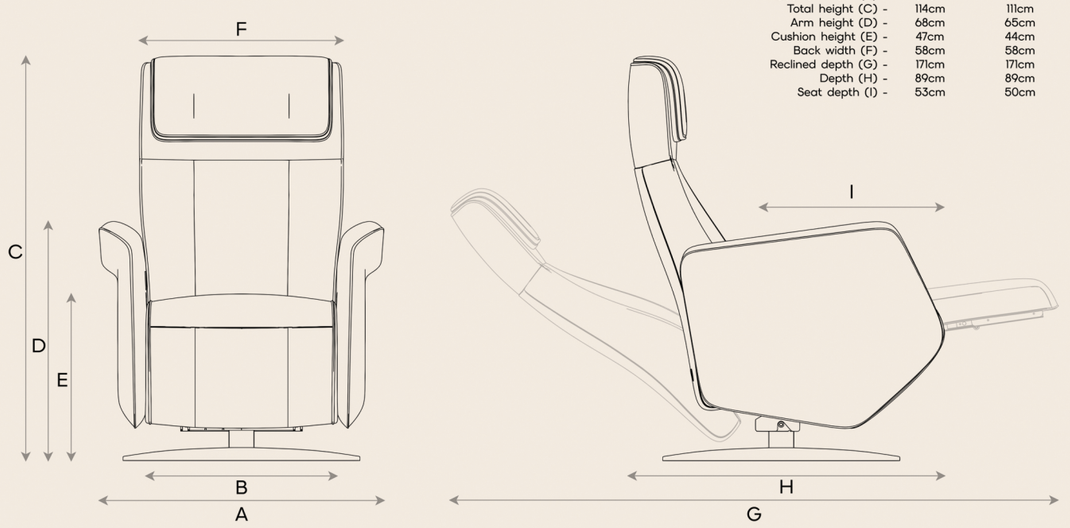

Available with either a wooden or metal swivel base, the Calma can be upholstered in a wide selection of fabrics, leathers or customers' own material (COM), offering flexibility to complement a wide range of interiors.
