Developed specifically to withstand the harshest industrial environments, these industrial firewalls offer uncompromising end-to-end security with industrial design and operation in mind.

## Product overview

The Cisco® Industrial Security Appliance 3000 (ISA 3000) is a true industrial firewall that provides OT-targeted protection based on proven enterprise-class security.

The ISA 3000, with four data links, is a DIN rail mount, ruggedized appliance that provides the widest range of access, threat, and application controls for the harshest and most demanding industrial environments.

**Figure 1.**

Cisco ISA 3000 with two copper and two fiber ports (left) or four copper ports (right)

The ISA 3000 bundles the proven security of the Cisco Secure Firewall with the visibility and control of industrial protocols and applications developed by leading automation vendors such as Omron, Rockwell, GE, Schneider, Siemens, and others. The ISA 3000 is key as you start converging IT and OT security and capturing the benefits of your industrial digitization efforts.

As a foundational component of your IoT/OT security journey, the ISA 3000 is the ideal ruggedized firewall to segment industrial networks, protect OT assets from potential threats, and build compliance with a variety of industrial standards, regulations, and guidelines such as NERC-CIP, ISA99/IEC62443, CFATS, ANSI/AWWA G430, and others.

Certified for deployment in the most demanding industries (power utilities, oil and gas, transportation, mining, manufacturing, water utilities, and more), the ISA 3000 is widely used as a DMZ firewall to connect small, distributed industrial sites, enforce segmentation of large internal networks, and manage VPN connections to enable secure management of remote assets and seamless distributed operations.

The ISA 3000 protects industrial processes and vulnerable control equipment. It leverages industry-leading threat detection and vulnerability exploit protection rules developed by Cisco Talos®, including thousands of industrial-focused rules. Using OpenAppID and Deep Packet Inspection (DPI) of industrial protocols, it even lets you write your own custom detectors to create alerts and block or allow traffic based on the industrial application flows you most care about. Cisco Advanced Malware Protection (AMP) is also built in to continuously track suspect file propagation.

Managed through either a user-friendly on-box device manager, on-premises centralized management, or a cloud-based management solution, the ISA 3000 provides industrial-focused, out-of-the-box configuration and simplified operational management. And because these management tools are the same you already use with Cisco firewalls in your IT domain, it is easy to extend IT security to OT and enforce consistent security policies across domains.

As part of Cisco’s comprehensive security portfolio, the ISA 3000 interacts with your existing tools to deliver an integrated IT/OT security workflow. Cisco Cyber Vision provides host attribute information to enable construction of meaningful and contextual security policies. Cisco Identity Services Engine (ISE) can be leveraged to exchange unified policy updates as well as host context information using Security Group Tags (SGTs) for security enforcement. The ISA 3000 can also exchange NetFlow information with Cisco Stealthwatch® to provide network-level context information. The ISA 3000 provides insights and alerts to Cisco SecureX™ to streamline event triage and correlation, enabling coordinated, single-click defenses.

With the ISA 3000, you can build a secure IoT/OT infrastructure and leverage your existing IT security tools and expertise to help ensure production integrity, continuity, and safety.

## Your ruggedized choice for industrial firewall deployments

The Cisco ISA 3000 offers:

- Controlled traffic to, from, and between manufacturing cells or industrial zones
- Secured WAN connectivity for power substations and isolated industrial assets
- Flexible and secure enterprise-class remote access
- Critical network infrastructure services such as IP routing, NAT, DNS, DHCP, and more
- Unequaled threat protection for every level of networking and computing – from the switch, router, OS, and compute infrastructure to industrial control systems
- Wide support for industrial protocols for visibility and control over every level of your applications in both the industrial and enterprise space
- More levels of traffic continuity safety than other offerings in the industrial space.

**Table 1.** General capabilities of Cisco ISA 3000

Capability	Features
<b>Robust industrial design</b>	<ul style="list-style-type: none"> <li>• Built for harsh environments and temperature ranges (-40° to 158°F; -40° to 70°C)</li> <li>• Hardened for vibration, shock, surge, and electrical noise immunity</li> <li>• Four Gigabit Ethernet uplink ports, providing multiple resilient design options (4 copper or 2 copper plus 2 fiber)</li> <li>• Complies with multi-industry specifications for industrial automation, Intelligent Transport Systems (ITS), and electrical substation environments</li> <li>• Improves uptime, performance, and safety of industrial systems and equipment</li> <li>• Compact DIN rail unit design with industrial LED features, allowing easy monitoring</li> <li>• Fanless and convection cooled with no moving parts for extended durability</li> <li>• IEEE 1588v2 Precision Time Protocol (PTP) clock synchronization (default profile is supported)</li> <li>• Alarm I/O for monitoring and signaling to external equipment.</li> </ul>

Capability	Features
<b>User-friendly GUI device manager</b>	<ul style="list-style-type: none"> <li>• On-device management for local awareness and immediate control using Cisco Firepower® Device Manager</li> <li>• Centralized management configuration, logging, monitoring, and reporting using Cisco Firepower Management Center</li> <li>• Cloud-based management option available with Cisco Defense Orchestrator</li> <li>• Multidevice management that handles hundreds of devices</li> <li>• User-specific access and control customizations</li> </ul>
<b>Traffic continuity and protection</b>	<ul style="list-style-type: none"> <li>• Full “lights out” traffic bypass copper ports</li> <li>• Default passive deployment learning mode</li> <li>• Software updates without traffic loss</li> <li>• Connection limitations to protect from denial-of-service-causing traffic</li> <li>• Latency detection and mitigation functions</li> <li>• Quality-of-service policies</li> </ul>
<b>OT and ICS protocol support</b>	<ul style="list-style-type: none"> <li>• BACnet</li> <li>• Common Industrial Protocol (CIP) (AppID for individual CIP applications available)</li> <li>• Companion Specification for Energy Metering (COSEM)</li> <li>• Connection Oriented Transport Protocol (COTP)</li> <li>• Distributed Network Protocol (DNP3)</li> <li>• EtherNet/IP</li> <li>• Generic Object Oriented Substation Events (GOOSE)</li> <li>• Generic Substation Events (GSE)</li> <li>• Emission Control Protocol</li> <li>• Fujitsu Device Control</li> <li>• Honeywell Control Station/NIF Server</li> <li>• Honeywell Esperion DSA Server Monitor</li> <li>• IEC 60870-5-104 (AppID for individual commands available)</li> <li>• IEC 61850 MMS (AppID for individual commands available)</li> <li>• ISO Manufacturing Message Specification (MMS)</li> <li>• Modbus</li> <li>• Omron FINS</li> <li>• OPC Unified Architecture (OPC-UA)</li> <li>• Q.931</li> <li>• Siemens S7</li> <li>• SRC</li> <li>• TPKT</li> </ul>

**Table 2.** Access control capabilities

Capability	Features
<b>Proven, extensible access control</b>	<ul style="list-style-type: none"> <li>• Enforces ISA99/IEC 62443 segmentation needs</li> <li>• Stateful inspection (Layers 2 through 7)</li> <li>• Transparent and routed firewall operation modes</li> <li>• Provides features to enable electronic security perimeter (ESP) for NERC-CIP compliance</li> <li>• Next-Generation Intrusion Prevention System (NGIPS)</li> <li>• Identity-based access control policies (users, devices, SGTs, etc.)</li> <li>• VPN: Remote Access, site-to-site</li> </ul>
<b>Application control</b>	<ul style="list-style-type: none"> <li>• Visibility and control of all DMZ infrastructure</li> <li>• Visibility and control of industrial applications</li> <li>• Visibility and control of individual protocol commands and values</li> <li>• ICS/OT protocol visibility and/or control</li> </ul>
<b>Remote access enablement and control</b>	<ul style="list-style-type: none"> <li>• Network access control via Cisco AnyConnect®</li> <li>• Cisco ISE support</li> <li>• Site-to-site VPN</li> <li>• Remote Access VPN</li> <li>• Cisco Secure Desktop</li> <li>• Support for Citrix and VMware clientless connections</li> </ul>
<b>Multilevel access controls</b>	<ul style="list-style-type: none"> <li>• Global block lists – automated or manual</li> <li>• Global allow lists</li> <li>• Third-party intelligence feed utilization</li> <li>• File allow lists</li> <li>• File block lists</li> <li>• Application-level access control</li> <li>• 802.1X support</li> </ul>
<b>Cisco TrustSec® controls</b>	<ul style="list-style-type: none"> <li>• In-band and out-of-band identity</li> <li>• Active Directory integration</li> <li>• Policy based on SGTs</li> <li>• 802.1X support</li> <li>• MACsec and MAC Authentication Bypass (MAB) support</li> <li>• Enforces endpoint security state for remote access</li> </ul>

**Table 3.** Intrusion detection and protection capabilities

Capability	Features
<b>Uncompromising threat detection and protection</b>	<ul style="list-style-type: none"> <li>• Leverages industry-leading rules developed by Cisco Talos research teams</li> <li>• Over 55,000 rules, providing the widest range of protection anywhere</li> <li>• Hundreds of industrial-focused rules</li> <li>• Industrial equipment exploit protection rules</li> <li>• Protocol abuse identification</li> <li>• Protection for web-based control systems</li> <li>• Network behavior analytics</li> <li>• Passive device discovery</li> </ul>
<b>Threat network mapping</b>	<ul style="list-style-type: none"> <li>• Passive device identification</li> <li>• Mobile device identification</li> <li>• Application host network mapping</li> <li>• Vulnerability/host network mapping</li> <li>• User/host network mapping</li> </ul>
<b>Threat discovery</b>	<ul style="list-style-type: none"> <li>• Indicators of Compromise (IoC) tracking</li> <li>• OpenAppID – open community ID system</li> <li>• Correlation policies and responses</li> <li>• Traffic variance detection</li> <li>• Router-based remediation actions</li> <li>• NetFlow tracking</li> <li>• 55,000+ threat identifiers</li> <li>• Customizable identifiers</li> <li>• Can create wholly new identifiers</li> <li>• Widest identifier contributorship</li> </ul>
<b>File tracking</b>	<ul style="list-style-type: none"> <li>• Approved file trace</li> <li>• Suspect file trace</li> <li>• Malware match</li> </ul>

**Table 4.** Networking capabilities

Capability	Features
<b>DMZ infrastructure</b>	<ul style="list-style-type: none"> <li>• DNS services</li> <li>• Dynamic Host Configuration Protocol (DHCP) services</li> <li>• Authentication, authorization, and accounting (AAA) support</li> <li>• IP routing (v4 and v6)</li> </ul>
<b>Layer 3 routing</b>	<ul style="list-style-type: none"> <li>• IPv4 static routing</li> <li>• Dynamic routing (Routing Information Protocol [RIP], Enhanced Internet Gateway Routing Protocol [EIGRP], Intermediate System to Intermediate System [IS-IS], Open Shortest Path First [OSPF], and Border Gateway Protocol [BGP])</li> </ul>

Capability	Features
<b>Network Address Translation (NAT)</b>	<ul style="list-style-type: none"> <li>• Static NAT</li> <li>• With port translation, one-to-many, nonstandard ports</li> <li>• Dynamic NAT</li> <li>• Dynamic Port Address Translation (PAT)</li> <li>• Identity NAT</li> </ul>
<b>Layer 2 IPv6</b>	<ul style="list-style-type: none"> <li>• IPv6 host support, HTTP over IPv6, Simple Network Management Protocol (SNMP) over IPv6</li> </ul>
<b>Trunking</b>	<ul style="list-style-type: none"> <li>• 802.1q trunks supported</li> </ul>
<b>Logging</b>	<ul style="list-style-type: none"> <li>• Local logs, syslog, Security Analytics and Logging (SAL), eStreamer, and Log in the management application</li> <li>• Proven integration with leading security information and event management (SIEM) systems (QRadar, Splunk, etc.)</li> </ul>
<b>Clock synchronization</b>	<ul style="list-style-type: none"> <li>• IEEE 1588 (hardware-enabled PTP)</li> </ul>

## Performance specifications

**Table 5.** Performance using Cisco Firepower Threat Defense (FTD)

Feature	Performance
<b>Throughput: NGIPS (1024B)</b>	450 Mbps
<b>Throughput: Firewall (FW) + Application Visibility and Control (AVC) (1024B)</b>	330 Mbps
<b>Throughput: FW + AVC + Intrusion Prevention System (IPS) (1024B)</b>	332 Mbps
<b>Maximum concurrent sessions, with AVC</b>	50,000
<b>Maximum new connections per second, with AVC</b>	1500
<b>IPsec VPN throughput</b>	1024B TCP with Fastpath
<b>Maximum VPN peers</b>	25
<b>Application Visibility and Control (AVC)</b>	Standard, supporting more than 4000 applications as well as geo locations, users, and websites
<b>URL filtering</b>	<p>More than 80 categories</p> <p>More than 280 million URLs categorized</p>

Feature	Performance
Defined interfaces	200, 400 (with SecPlus license on ASA), 400 (FTD)
VLAN counts	5, 100 (with SecPlus license on ASA), 100 (FTD)
IPv4 MACsec Access Control Entries (ACEs)	1000 with default TCAM template
NAT	Bidirectional, 128 unique subnet NAT entries, which can expand to tens of thousands of translated entries if designed properly

## Security feature specifications

**Table 6.** Security features

Feature	Support information
Transport Layer Security (TLS) decryption	Yes
AVC: OpenAppID support for custom, open-source application detectors	Standard
Cisco security intelligence	Standard, with IP, URL, and DNS threat intelligence
Cisco Firepower NGIPS	Available; can passively detect endpoints and infrastructure for threat correlation and IoC intelligence
Cisco Secure Firewall (formerly Cisco AMP for Networks)	Available; enables detection, blocking, tracking, analysis, and containment of targeted and persistent malware, addressing the attack continuum both during and after attacks. Integrated threat correlation with Cisco Secure Endpoint (formerly Cisco AMP for Endpoints) is also optionally available
Cisco Secure Malware Analytics (formerly Cisco Threat Grid) sandboxing	Available
Automated threat feed and IPS signature updates	Yes: class-leading Collective Security Intelligence (CSI) from the Cisco Talos group <a href="https://www.cisco.com/c/en/us/products/security/talos.html">https://www.cisco.com/c/en/us/products/security/talos.html</a>
Third-party and open-source ecosystem	Open API for integrations with third-party products; Snort® and OpenAppID community resources for new and specific threats
High availability and clustering	Active/standby failover
Cisco Trust Anchor technologies	Includes Trust Anchor technologies for supply chain and software image assurance

## Hardware specifications

[Table 7](#) lists physical specifications, [Table 8](#) lists safety standards and compliance specifications, and [Table 9](#) gives information about networking standards.

**Table 7.** Physical specifications

Description	Specification
<b>Hardware</b>	<ul style="list-style-type: none"><li>• 4-core Intel® Atom® processor (industrial temp.)</li><li>• 8-GB DRAM (soldered down)</li><li>• 16-GB onboard flash memory</li><li>• mSATA 64 GB</li><li>• 1-GB removable SD flash memory card (industrial temp.)</li><li>• Mini-USB connector for console</li><li>• RJ-45 traditional console connector</li><li>• Dedicated 10/100/1000 management port</li><li>• Hardware-based anti-counterfeit, anti-tamper chip</li><li>• Factory reset option</li></ul>
<b>Alarm I/O</b>	<ul style="list-style-type: none"><li>• Two alarm inputs to detect dry contact open or closed</li><li>• One Form C alarm output relay</li></ul>
<b>Dimensions (WxHxD)</b>	<ul style="list-style-type: none"><li>• 11.2 x 13 x 16 cm (4.41 x 5.12 x 6.30 in.)</li></ul>
<b>Weight</b>	<ul style="list-style-type: none"><li>• 1.9 kg (4.2 lb)</li></ul>
<b>Power supply and ranges</b>	<ul style="list-style-type: none"><li>• Dual internal DC</li><li>• Nominal: ± 12V DC, 24V DC, or 48V DC</li><li>• Maximum range: 9.6V DC to 60V DC</li><li>• Power consumption: 24W</li></ul>
<b>Mean time between failures (MTBF)</b>	<ul style="list-style-type: none"><li>• ISA-3000-4C: 398,130 hours</li><li>• ISA-3000-2C2F: 376,580 hours</li></ul>

**Table 12.** Supported Cisco ruggedized SFPs\*

Product number	Type
GLC-SX-MM-RGD=	1000 BASE-SX Ruggedized
GLC-LX-SM-RGD=	1000 BASE-LX/LH Ruggedized
GLC-FE-100FX-RGD=	100 BASE-FX Ruggedized
GLC-FE-100LX-RGD=	100 BASE-LX Ruggedized

\*For the complete list of supported SFP models, please refer to [https://www.cisco.com/en/US/products/hw/modules/ps5455/products\\_device\\_support\\_tables\\_list.html](https://www.cisco.com/en/US/products/hw/modules/ps5455/products_device_support_tables_list.html).

MM = multi-mode fiber

SM = single-mode fiber

**Table 13.** Suggested power supply

Product number	Details
PWR-IE50W-AC-IEC	AC to DC 24V/2.1A DIN Rail power supply, input 100-240VAC/1.25A 50-60Hz, output 24VDC/2.1A, IEC Plug
PWR-IE50W-AC	AC to DC 24V/2.1A DIN Rail power supply, input 100-240VAC/1.25A or 125-250VDC/1A, output 24VDC

## Warranty information

Warranty information is available at <https://www.cisco-servicefinder.com/warrantyfinder.aspx>.

## Cisco environmental sustainability

Information about Cisco’s environmental sustainability policies and initiatives for our products, solutions, operations, and extended operations or supply chain is provided in the “Environmental Sustainability” section of Cisco’s [Corporate Social Responsibility](#) (CSR) Report.

Reference links to information about key environmental sustainability topics (mentioned in the “Environmental Sustainability” section of the CSR Report) are provided in the following table.

Sustainability topic	Reference
Information on product material content laws and regulations	<a href="#">Materials</a>
Information on electronic waste laws and regulations, including products, batteries, and packaging	<a href="#">WEEE compliance</a>

Cisco makes the packaging data available for informational purposes only. It may not reflect the most current legal developments, and Cisco does not represent, warrant, or guarantee that it is complete, accurate, or up to date. This information is subject to change without notice.

## Cisco and Partner Services

At Cisco, we're committed to minimizing our customers' TCO, and we offer a wide range of services programs to accelerate customer success. Our innovative programs are delivered through a unique combination of people, processes, tools, and partners, resulting in high levels of customer satisfaction. Cisco Services helps you protect your network investment, optimize network operations, and prepare your network for new applications to extend network intelligence and the power of your business. Some of the key benefits our customers can get from Cisco Services follow:

- Mitigating risks by enabling proactive or expedited problem resolution
- Lowering TCO by taking advantage of Cisco expertise and knowledge
- Minimizing network downtime
- Supplementing your existing support staff so they can focus on additional productive activities

For more information about Cisco Services, refer to Cisco Technical Support Services or Cisco Advanced Services at <https://www.cisco.com/web/services/>.

## Cisco Capital

### Flexible payment solutions to help you achieve your objectives

Cisco Capital® makes it easier to get the right technology to achieve your objectives, enable business transformation, and stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services, and complementary third-party equipment in easy, predictable payments. [Learn more.](#)
