Overview

With so much depending on your network, even a routine issue can have a major effect on your customers, your employees, and your business profitability. Cisco® Services provides the support you need from first purchase of your Cisco products with our foundational services through technology refresh and beyond with our high-value services.

Your IT infrastructure is the lifeline that connects your business to customers and suppliers. Business success requires maintaining high service levels for your network while reducing costs and expanding your network as your business grows. Cisco Smart Net Total Care® (SmartNet®) and our other foundational services can help you meet these objectives.

Manage risks to business continuity

Cisco Smart Net Total Care helps reduce downtime with fast, expert technical support and flexible hardware coverage provided by the Cisco Technical Assistance Center (TAC). It also offers integrated smart capabilities, providing current information about your installed base, contracts, and security alerts to enhance the efficiency of your support workflows.

- **Resolve problems faster** by identifying issues quickly and streamlining your incident management processes to improve IT service levels.
- **Reduce risk** by having access to Cisco technical experts and smart tools that improve visibility into the state of your IT infrastructure 24 hours a day, 365 days a year.
- **Increase operational efficiency** through proactive management tools and automated processes which make network administrators and managers more productive.

What's included

- Award-winning technical support from the Cisco TAC
- Advance hardware replacement, in as little as two hours
- Operating System (OS) software updates
- Access to online resources
- Entitlement to Cisco installed base insights through smart capabilities

Cisco services provide choices for all types of companies, from basic service for commercial-grade products with [Support Essentials](#) to round-the-clock assistance for all your Cisco devices with Smart Net Total Care.

The TAC is staffed by Cisco experts and is accessible 24 hours a day, 365 days a year. Technical service available through the TAC is backed by advance hardware replacement with fast response times, including onsite support options, and access to the latest OS software for your licensed feature set. Online self-help tools include our extensive knowledge library, software downloads, and support tools designed to help you resolve network issues quickly, often without opening a case.

Smart-entitled capabilities

All support customers are entitled to smart capabilities¹, including access to the portal and the collector software. Smart capabilities are delivered through the Cisco Services Connection portal, providing actionable information and automation to

¹ Smart capabilities such as the Cisco portal and collector software must be configured or enabled to deliver the functionality described.

support your Cisco products. Customizable screens show you up-to-date information about the service coverage, product lifecycles, and security and product alerts that apply to your network.

The collector automatically gathers device support information for Cisco products, including serial numbers, installed cards and modules, product IDs, and more. This saves time and provides a more current view compared with manual efforts. The collector can also identify hardware or software versions and configuration files for your Cisco network devices.

The portal also provides interactive workflows that simplify support management processes. Altogether, the foundational technical services and smart capabilities work to provide the visibility and insight you need to improve the efficiency of your support operations, resolve problems more quickly, and mitigate risk.

Outcome benefits

Table 1. Outcome benefits

		Risk Mitigation	Operational Efficiency	Faster Problem Resolution

 <p>Service Coverage Management</p> <ul style="list-style-type: none"> • Covered/uncovered, right coverage • Renewal preparation and planning • Budget Planning 		●	●	
 <p>Product Lifecycle Management</p> <ul style="list-style-type: none"> • Up-to-date installed base information • EoS/EoL, software version inconsistencies • Automation to reduce cost and risk of manual processes 		●	●	

Technical service and incident management - Get the support you need when and how you need it

When a network problem affects business-critical systems, it requires fast response and a deep understanding of the technology to resolve the incident quickly. Smart Net Total Care offers award-winning technical support from the TAC combined with advance hardware replacement, onsite support options, online tools, and self-help support for device-level support to help you reduce the risk of business interruptions caused by network issues. These capabilities help ensure that you get rapid response and can quickly identify your devices and their service coverage information in order to streamline your interaction with TAC support representatives.

Security and product alerts - Know the security and product alerts that affect your network

Staying current with Cisco alerts regarding security recommendations, hardware updates, and software releases can be challenging. Smart capabilities help preempt network disruption by allowing you to identify and manage relevant alerts for

your devices. They proactively identify which devices are affected by Cisco published product alerts and security advisories and enable you to document alert-related activity.

Alert information is available for hardware, software and security alerts, and field notices. An alert management workflow allows you to assign status information to alerts. It then filters future alerts so that you receive only those that still require your attention. If you close an alert, or change its status to “action taken”, you will not be distracted by that alert in the future. Alert status information also makes it easy for supervisors to monitor your team's progress toward desired goals as they work on reviewing alerts and performing the required actions.

Service coverage management - Identify what's covered and what's not

Without good visibility into your installed base and service contract status, there is a risk that an uncovered device will have an outage, and then you will be scrambling to find a solution while your network is compromised. The portal reports help ensure that your business-critical assets have the necessary service coverage to meet business needs and comply with corporate policies.

The portal provides automated installed base and contract management functionality to assist you in determining the proper coverage for your Cisco devices. Whereas manual methods of tracking service coverage for large or complex networks can be time consuming and prone to error, SmartNet uses automation to save time and reduce risk. Regular data collection and flexible reporting capabilities help you manage your Cisco installed base and service contracts, identifying and tracking what is new, what's changed, what's covered, and what's not.

Product lifecycle management - Obtain the information to plan for product replacements and upgrades

Using up-to-date data from the portal can provide dramatic efficiencies over maintaining labor-intensive spreadsheets while also reducing the risk of errors. The portal reports can help you maintain a current view of your Cisco installed base, including device and configuration details such as serial number, product ID, Cisco IOS[®] software version, installed memory and firmware, IP address, hostname, and more. Up-to-date records about coverage also simplifies your renewal and budget planning processes. SmartNet enables you to quickly identify service contracts that will be expiring at various intervals so that you can plan for renewals and identify budget requirements.

By providing enhanced visibility into your installed base, you can:

- Quickly identify Cisco products that are reaching end of life, end of sale, or end of support
- Easily see what has been moved, added, or changed in your network
- Verify that your Cisco hardware is running current, consistent, and supported software versions
- Mitigate risk and plan for upgrades for equipment that is no longer supported

Your technical service options

No matter the size of your business, you are dependent on your network applications and vulnerable to the lost revenue that can result from a network outage. But you also cannot afford to commit to a service program that doesn't meet your particular business needs. Cisco services provides a range of options for you to choose from for accessing our award-winning technical assistance center. You can choose from a basic level of 8x5 callback within one business day for non-critical issues with Support Essentials to around the clock direct phone access 7x24x365 to our TAC engineers. It's up to you to choose the option that is right for your network and your situation.

You have the same type of flexibility with advance hardware replacement. If you need fast replacement in as little as two hours for your most critical network segments, that's available. If next business day replacement for devices is acceptable, that is an option too.

Table 2. Advance hardware replacement service levels

Service Level	Description
Support Essentials 8x5xNext Business Day	Next-business-day delivery, local business hours based on depot time, 5 days a week
Smart Net Total Care 24x7x2	2-hour response, 24 hours a day, 7 days per week, including holidays
Smart Net Total Care 24x7x4	4-hour response, 24 hours a day, 7 days a week, including holidays
Smart Net Total Care 8x5x4	4-hour response, local business hours based on depot time, 5 days a week
Smart Net Total Care 8x7xNext Calendar Day	Next-calendar-day delivery, local business hours based on depot time, 7 days a week
Smart Net Total Care 8x5xNext Business Day	Next-business-day delivery, local business hours based on depot time, 5 days a week
Smart Net Total Care without RMA	Software and installation-focused TAC support only, no RMA or other TAC support

If you want support services in person at your location, Cisco offers Onsite options for many of our service levels.

Table 3. Onsite support service levels

Service Level	Description
Smart Net Total Care Onsite 24x7x2	2-hour response, 24 hours a day, 7 days per week, including holidays
Smart Net Total Care Onsite 24x7x4	4-hour response, 24 hours a day, 7 days a week, including holidays
Smart Net Total Care Onsite 8x5x4	Based on depot time 4-hour response, 9 a.m. to 5 p.m., if the request is received before 1 p.m., the service (including parts, labor, and materials) will be provided the same day. For requests received after 1 p.m., the service will be provided the following business day
Smart Net Total Care Onsite 8x7xNext Calendar Day	Based on depot time Next calendar day, 9 a.m. to 5 p.m., if the request is received before 3 p.m., the service (including parts, labor, and materials) will be provided the next calendar day After 3 p.m., the service (including parts, labor, and materials) will be provided the following calendar day
Smart Net Total Care Onsite 8x5xNext Business Day	Based on depot time Next business day, 9 a.m. to 5 p.m., if the request is received before 3 p.m., the service (including parts, labor, and materials) will be provided the next business day After 3 p.m., the service (including parts, labor, and materials) will be provided the following business day

When you're ready to upgrade your network devices

Operating your business with unsupported products poses risks to your business. An unsupported failed product can negatively impact business continuity, revenue, and compliance. When you want to update your network devices or migrate to new hardware, Cisco Migration Support Services can provide coverage for your hardware that reaches end-of-life during your technology migration.

Migration Support Services extend support for Cisco products that are no longer supported and past Last Day of Support (LDoS). They help you mitigate the risk of operating with unsupported, aging technologies while you plan and implement your upgrade projects. Migration Support Services provide a support solution that extends across your migration plan, and they are a lifeline when you cannot complete migration by LDoS. You can depend on continued support, so you can focus on your business goals and objectives. [Learn More.](#)

Related services to extend the value of your Cisco products

Cisco can offer you more high value and personalized services when you need them. You should consider:

- **Software support – Basic, Enhanced and Premium**

Cisco Software Support offers comprehensive coverage - from foundational support to Enhanced and Premium levels – for your Cisco software application products. The Basic level of service will help you keep your systems and business applications running smoothly. To fast-track the full benefits of your Cisco software, get the Enhanced or Premium levels of service. Our experts will assist your team with product onboarding, an IT adoption plan, providing proactive support, and help with quickly resolving and, often times, avoiding issues.

- **Solution Support**

Maximize performance, reliability and ROI of your Cisco solution with Cisco Solution Support. You get access to a team of Cisco solution experts that is your primary point of contact, delivering centralized support across your multiproduct, multivendor deployment. Whether you have an issue with a Cisco product or one from another vendor—or are just looking for guidance and assurance on your new solution—simply contact us. We'll take it from there and remain accountable for your case, from first call to resolution.

- **Business Critical Services**

As the next generation of Optimization services, Cisco Business Critical Services help you realize the full value of existing network capabilities. Streamline your IT operations workflow so you can focus on innovation. At every step of the way, our team of experts will guide your success. Make informed decisions faster with data that is easy to consume and act on. Detect problems in real-time and automatically open TAC cases without human intervention. Optimize the management of your network with powerful tools and Cisco experts who know your network. And quickly address cyber-attacks. Better yet, prevent them.

Why Cisco

You must align your network strategy with top company initiatives to continue to innovate and grow your business. Cisco can help you benefit from our experience and expertise. Cisco Services can make networks, applications, and the people who use them work better together. Our solutions and services build on our innovation and leadership in networking. Recognized by J.D. Power and Associates for providing “An Outstanding Customer Service Experience,” Cisco is the only company to have achieved CTSS certification eleven times.²
