

## SOMERSET

Somerset is a medium-sized county in the West Country of England, bounded to the north mainly by the sea. To the north-east it borders the City of Bristol in Gloucestershire. The adjoining county to the east is Wiltshire, to the south, Dorset, and to the west, Devon.

The main towns are Bath, Bridgwater and Taunton. The last (being the county town) never had separate jurisdiction over weights and measures, but Bath and Bridgwater continued to appoint their own inspectors into the twentieth century. There were also Municipal Boroughs at Glastonbury, Wells, and Yeovil, and in the nineteenth century there remained two significant manorial jurisdictions, at Watchet and Wiveliscombe.

The trade was based originally in Bristol, where brass was manufactured, and there was a brassfoundry operating in Bridgwater by the middle of the eighteenth century. There was also a long history of metalworking in Frome, where the Cockey family were inspectors and manufacturers of weights at various times.

A London scalemaker, Samuel Warmisham, set up in Bath around 1859, and the trade flourished thereafter. In Taunton, the Cullen family were scalemakers for over 60 years.

¶ 2oz brass weight stamped by a Somerset County inspector, probably around 1835. The denomination has been stamped later.

¶ 4oz bronze weight stamped by the inspector for Somerset County, District No.2, Frome. The weight also has the London marks showing that it was made by a member of the Founders Company in the reign of William IV. This weight has no indication of the denomination.

¶ 2oz brass weight, stamped SOMERSET 4 DISTRICT, probably indicating Wincanton before 1858. On this weight the denomination is shown by the number 2 only, with no reference to 'ounces'.

<p>The first mark shown is seen on bronze weights and was probably used before 1834. The inspector appointed in 1834 was John George, who continued until his death in 1862 [BC 6/2/62]. The initials JG have been seen stamped on the reverse of a weight with the BC mark (see picture).</p> <p>William England was appointed the inspector in 1862 with an annual salary of £100 [BC 13/3/62], raised to £150 (1866), which would suggest that the inspection was his main occupation, although he is also described as the sub-editor of the Bath Journal [BC 30/3/65]. He acted until his death in 1871 [BC 26/10/71].</p> <p>James Williams was appointed the inspector in 1872. His son Albert, appointed as Assistant Inspector in 1888 [BC, 17/5/88], qualified in 1891, although James never qualified. They served together until 1903, and Albert acted alone from 1904 until 1906. W.A. Radford, who had qualified in Brighton in 1903/4, was inspector from 1907 until 1913, C.E. Hair was chief inspector from 1913 until 1948 [MR 48:59], T.H. Fallon from 1948-1960 [MR 48:74, 60:60] and J.J. Storey from 1960 through 1972 [MR: 60: 278].</p>				
<b>Bridgwater</b>	AncBo MB:1835 qsb		378	s:1836 [821] n:1880-c1930
<p>In 1835 the two market surveyors acted as inspectors. In 1839, Joseph Francis was reappointed as the IWM [SCG 26/1/39]. Edward Cogle Priest was appointed as IWM by the Recorder in 1848 [SM 8/7/48], as was James Boulting, a painter and plumber, in 1853 [TC 3/2/69], and he is listed in 1859 [HH] and in 1875 [K]. He served until 1876.</p> <p>Charles Sendell was appointed as inspector in 1877 [BC 8/2/77]. He was recorded as a housepainter in 1881 [Census], and was listed as the IWM from 1883 [K] until 1899 [MYBk], although he did not qualify.</p> <p>He was succeeded by William Kitch, who qualified in 1899/1900, and served until 1921, when authority was transferred to the county. The number 378 was still listed for the borough in 1928, but not in 1939.</p>				

¶ John George was the inspector for Bath from 1834 until about 1861. The weight shown above has his initials stamped on the reverse. Vivian's Directory of 1852 gives the times of his attendance at the office.

<b>Axbridge</b>	AncBo Unref Dis:1886		---	s:1825

Another mark, the letters AX above G surmounted by a crown, has also been attributed to Axbridge.

Axbridge is a small town that claimed to be a borough and acquired a full set of standards [21] in 1825. It was not granted the status of a municipal borough in 1835, but the sergeant-at-mace, Levi Bender, was appointed as IWM. It is likely that the standards were transferred to the county c1858, and in 1866 it was reported that the inspector was a police superintendent, presumably the county officer for No.3 district.

**Glastonbury** was given the status of a municipal borough in 1835 and acquired standards [910] in 1843. The borough police force was amalgamated with the county force in 1856, and inspection was probably transferred at that time.

**Taunton** was not considered as a borough in 1835, but it became a MB in 1877. The borough council tried to exclude the county inspector from its market as late as 1891, but Taunton was not formally a WM Authority.

**Wells** was designated as a municipal borough in 1835, when standards [671] were obtained and Robert Davies was appointed as the inspector. There was a borough police force but little is known about it. Inspection was probably transferred to the county police c1858.

<b>Yeovil</b>	AncBo MB:1854 cp		247	s:1835  n:1879-1889
---------------	------------------------	--	-----	---------------------------

A mark consisting of a crown and the letters BY has been tentatively attributed to Yeovil, Yeovil had an ancient charter, but it did not become a municipal borough in 1835. However, in that year standards [690] were acquired for the use of the portreeve. The status of municipal borough was granted in 1854, and there was a borough police force for a short time, until it was amalgamated with the county force in 1859. By 1862 [TC 13/8/62] Supt Smith of the County Police was acting as the inspector. The borough retained its authority, and a separate number (247) was issued in 1879. In 1880 [WG 7/5/80] Supt Smith received a salary of £4 per annum from the Borough Council for his WM duties. The arrangement continued until his death in 1883. Stephen Harris was appointed as the inspector in 1883 [WG 9/11/83], in preference to Smith's successor as superintendent of the county police, and was listed in 1889 [K].

The borough was disqualified as a WMA in 1889 because its population was less than 10,000.

<b>Watchet &amp; Williton</b>	Manors			s:1826 r:1856

The Earls of Egremont were Lords of the Manors of Watchet and Williton, and some of their standards from 1766 are still extant. Imperial standards [323] were obtained in 1826 and inspection remained under the control of the Court Leet until 1866 at least. At that time, four local tradesmen acted as inspectors: in 1868, two acted in Watchet and two in Williton [TC 4/11/68].

The Court Leet still continued to function on a ceremonial basis, meeting at the Bell Inn, until its auction in 1922 [WT 6/1/22]. 'Inspectors of weights and measures' were being appointed as late as 1948 [MR 48:26].

**Wiveliscombe** A short set of standards [858] was issued in 1837 for the use of the portreeves in this Manor. The portreeves had acted previously as IWMs, their authority being reaffirmed in 1834 [TC 3/9/34]. The two portreeves were elected annually at the Court Leet but, in 1865, they were warned that if the inspection were not carried out properly, the WM inspection would be transferred to the police [SM 21/11/65]; the inspection was done [SM 26/12/65]. The standards were reverified in 1873, and it is possible that inspection was transferred to the county at that time.

¶ On the right is a notice showing that the Watchet Court Leet was engaged in the verification of weights and measures in 1847. The mark W4W that is presumably theirs is shown on a 4oz bronze weight below.
