

Table of Contents

Section I. Foundations of Venous and Lymphatic Medicine

1. Historical Perspective of Venous and Lymphatic Medicine
2. Venous Embryology and Anatomy
3. Venous Physiology and Pathophysiology
4. Functional Venous Insufficiency
5. Genetics of Chronic Venous Insufficiency
6. Epidemiology of Chronic Venous Disease
7. Classifying Venous Disease
8. Cutaneous Manifestations of Venous Disease
9. Compression Therapy
10. Veno-Active Medications in Chronic Venous & Lymphatic Disease
11. Sclerosing Agents & Mechanism of Action
12. Hematology for the Venous and Lymphatic Specialist

Section II. Diagnostic Modalities

13. Principles of Venous Ultrasound
14. Techniques, Standards, & Protocols
15. Venography
16. Intravascular Ultrasound (IVUS) in Venous Disease

Section III. Interventional Techniques

17. Tools and Techniques for Venous Access
18. Ultrasound-Guided Cannulation
19. Light-Based Therapies for C1 Disease
20. Sclerotherapy for C1–C6: Techniques, Indications, Complications
21. ClaCs for C1 and C2 Disease
22. Tumescence Anesthesia
23. Micro-Stab Phlebectomy
24. Thermal Ablation of Saphenous Veins (RF, Laser)
25. Non-Thermal Ablation of Saphenous Veins (MOCA, Glue, Foam)
26. Ablation Strategies for Various Reflux Patterns
27. Combined Ablation and Phlebectomy Versus Ablation Alone
28. Saphenous-Sparing Hemodynamic Strategies
29. Venous Stenting
30. Systemic Thrombolysis
31. Venous Thrombectomy and Catheter-Based Thrombolysis
32. IVC Filters
33. Prosthetic Valves and Valvuloplasty
34. Less Used Surgical Approaches

Section IV. Venous Compressive Disorders

35. Overview of Venous Compressive Disorders
36. Iliac Vein Compression (NIVL; previously May-Thurner Syndrome)
37. Left Renal Vein Compression (Previously Nutcracker Syndrome)
38. Thoracic Outlet Syndrome (With and Without Thrombosis)
39. Popliteal Entrapment Syndrome
40. Other Considerations: Popliteal Aneurysm

Section V. Clinical Management of Thromboembolic Disease

41. Superficial Venous Thrombosis (SVT)
42. Distal Lower Extremity Deep Vein Thrombosis (DVT)
43. Acute Proximal Non-Iliofemoral or Caval DVT
44. Acute Iliofemoral and/or IVC DVT
45. Acute Pulmonary Embolism and its Potential Chronic Consequences
46. Upper Extremity and SVC Acute DVT

Section VI. Clinical Management of Chronic Venous Disorders

47. Upper Extremity DVT
48. Overview: Indications, Techniques, Outcomes, and Complications
49. Superficial Venous Disease Management (C1–C2)
50. Venous Leg Ulcer Management (C5–C6 Disease)
51. Special Considerations: C4 Venous Skin Disease
52. Special Considerations: Isolated C3 Venous Swelling
53. Special Considerations: Perforator Vein Disease
54. Special Considerations: Persistent Swelling Post-Stenting

Section VII. Clinical Management of Pelvic Vein Disorders

55. Overview: Nomenclature, Pathophysiology, and Classification
56. Pelvic Pain Generators in Women
57. Venous-Origin Chronic Pelvic Pain in Women
58. Vulvar Varicose Veins
59. Male Pelvic Venous Disorders
60. Lower Extremity Varicose Veins of Pelvic Origin in Women

Section VIII. Venous Malformations

61. General Overview: Historical Background
62. Definition & Classification: ISSVA, Hamburg & Angiographic

63. Contemporary Diagnosis & Management
64. Differential Diagnosis: Hemangioma
65. Etiopathogenesis: Coagulation Issue
66. Etiopathogenesis: Genetic Issue
67. Extratruncular Lesions – Management and Complications
68. Truncular Lesions: IVC & Iliac-Femoral Vein Dysplasia
69. Special Issue: Vascular Bone Syndrome
70. Special Issue: Syndromic Condition – Klippel-Trenaunay Syndrome
71. Special Issue: Marginal Vein
72. Special Issue: Multidisciplinary Team Approach

Section IX. Lymphedema

73. General Overview
74. Lymphatic Embryology and Anatomy
75. Translational Medicine in Phlebo-Lymphedema: Micro to Macrocirculation
76. Etiopathogenesis – Primary
77. Etiopathogenesis – Secondary
78. Physiology – Phleboedema View: Veno-Dynamic Aspect
79. Physiology – Lymphedema View: Lympho-Dynamic Aspect
80. Clinical Diagnosis & Management – Primary Phlebolympedema
81. Clinical Diagnosis & Management – Secondary Phlebolympedema
82. Special Issue: Incalculant Stasis Ulcer
83. Special Issue: Lifestyle for Phlebo-Lymphedema Patients

Section X. Special Populations

84. Venous Disease During Pregnancy
85. Venous Disease in the Context of Modern Hormonal Interventions:
HRT, Selective Estrogen Receptor Modulators, and IVF
86. Hand and Feet Veins
87. Forehead and Periorbital Veins
