Bemis Pure Care® 750 Plus

The Bemis Pure Care® 750 Plus toilet seat is elevated 7.5cm to make sitting and standing easier. Its innovative shield under the ring keeps everything in the bowl and is easy to clean. The wide, comfortable ring is designed to eliminate pressure points and has a weight capacity of 450kg.

The seat is securely fastened with Bemis Ultra-Fix® fixation and support arms providing additional safety and assistance to users. Ergonomic design allows the user to place their hands where they can best support themselves during use. Support arms are weight bearing and tested to over 135kg per side.

- Comfortable 53cm width between the arms fits in virtually all bathrooms while providing extra width for the user
- Heavy duty, solid plastic seat tested to 450kg weight capacity. Special ring bumpers for added security
- Fits most manufacturer pans
- Made with eco-friendly materials and processes
- Easy to correctly and securely install – with Bemis Ultra-Fix® nuts
- Arm width allows the seat ring to be raised in the upright position for easy cleaning and standing use of the toilet

Why Trojancast

Trojan built a complete new factory to manufacture Trojancast products separate from all other production areas, the dedicated factory has been equipped with the latest technologies and is run by a team of specialist personnel who take pride in each and every Trojancast bath they produce.

Quality means everything

At each stage of production each individual bath is checked to ensure it reaches our high standards. Each individual employee that checks the bath stamps a label acknowledging they have fulfilled their job requirement. This ensures that the bath manufactured meets our quality criteria. This check label is placed on the back of the bath and remains with it through to delivery and installation.

Adding value at every stage

As well as the natural benefits of acrylic and the intensive reinforcement of the Trojancast process, all Trojancast baths come with our luxury fittings pack.

The guarantee on a Trojancast bath increases from our standard 25 years to 30 years, giving you extra peace of mind.

Substantial reinforcement
Trojancast is an intensive reinforcement process offered by Trojan to all our standard acrylic baths*. This reinforcement process results in each bath being incredibly strong and hard-wearing.

Insulating properties
Trojancast British racing green resin jacket covers the entire underside of the bath adding real strength and insulating properties. The additional bath thickness reduces the heat of the water being lost through the side walls, keeping your water hotter for longer.

Peace of mind
Trojancast results in a bath that has extra strength and rigidity – traditionally attributes only associated with cast iron baths. Ideal for larger families, hotels, B&Bs and rented accommodation.

Made in England
Our baths are made with pride in Yorkshire, England. We take control of all our processes giving you peace of mind. Trojancast should not be confused with imported baths claiming to have been through the same process and have the same properties. If it is not made in England it is not to the same standard.

Available on any range
Trojancast is available on all standard Trojan Baths* – we don't have a limited range, you can add it to almost any bath you choose!

Guaranteed
The guarantee on a Trojancast bath increases from our standard 25 years to 30 years. No imported bath will offer the same assurances.

VICEROY

Waterproof Bath Panels

When a wood based material like MDF is used, the surface is painted but over time the paint has a tendency to crack, which means without its protective covering, the MDF core quickly absorbs moisture causing swelling and softening which can also lead to a damp smell in the bathroom. Waterproof panels eliminate the risk of this happening and are also much lighter in weight than MDF.

Advantages of waterproof over other types of bath panels

- Made with a combination of PVC and polyurea.
- Will not crack or warp in wet or steamy environments.
- Completely formaldehyde free and recyclable which means it is more eco-friendly.
- The lifespan is considerably more than that of MDF bath panels.
- Lighter and easier to cut than MDF.
- Two piece panels 15mm thick and adjustable in height from 480 to 550mm (main panel 480mm plinth 100mm)

Guaranteed to remain 100% waterproof even when cut to any shape or size
