The Bathroom

Wall Hung Pans

Silver Ion Technology

All Creavit sanitaryware benefits from the addition of silver ions which are applied to the ceramic surface during the manufacturing process.

This inhibits bacteria formation by 99.9%. It is scientifically proven that Silver Ion technology transforms the bathroom, where bacteria formation is rampant, into a safe and hygienic space.

Ducky

Sized for Children, Inspired by Children

Ducky is the first bathroom to win the A' Design Award. Designed especially for children in mind, it creates a fun environment with its charming form. Ducky offers safe usage with its soft curved edges.

Pia Tornado Flush *Rimless*

Tornado Flush Rimless is a completely new flushing system, designed to flush and clean both the rim and the bowl in an innovative and more effective way than conventional systems.

It does this by re-imagining the way a toilet flushes and instead of letting water pour down from the rim, as a traditional flush does, the Tornado Flush Rimless projects three powerful jets of water from within the bowl. This creates a 'whirlpool' motion which ensures that the cleaning process cleans the entire surface as well as providing a far more thorough and effective flush, in doing so the Pia Tornado is also not only quieter but more water efficient.

Orto

Hands Free No Touch' Flush Option

All Capital Dual Flush Cisterns are now available with an Infra-Red no touch hygienic flushing upgrade option. The watersaving internal upgrade option allows the user to determine the duration of the flush by cleverly recognising the required flush (half or full adjustable from 2 to 6 litres) by the movement of the user's hand i.e. if the hand is kept firm over the button the cistern activates a full flush, likewise if the hand is waved over the button, the flush volume is partial.

- No Touch Hygienic Flush
 - Infra-Red Sensor
 - Water Saving
 - Requires 4 x AA Batteries (not included)
 - Quick and Easy Install
 - Built-In Manual Override
 - Battery Life Cycle
- Approximately 15,000 Flushes

Hands Free No Touch' Flush Option

All Capital Dual Flush Cisterns are now available with an Infra-Red no touch hygienic flushing upgrade option. The watersaving internal upgrade option allows the user to determine the duration of the flush by cleverly recognising the required flush (half or full adjustable from 2 to 6 litres) by the movement of the user's hand i.e. if the hand is kept firm over the button the cistern activates a full flush, likewise if the hand is waved over the button, the flush volume is partial.

- No Touch Hygienic Flush
- Infra-Red Sensor
- Water Saving
- Requires 4 x AA Batteries (not included)
- Quick and Easy Install
- Built-In Manual Override
- Battery Life Cycle

Wall Hung WC Pan Frames

Under Window/Furniture Wall Hung Pan Frame 0.82m

DURABLE: Made from epoxy coated, painted steel which has been tested for 200 hours in a salty mist environment. Guaranteed anti-rust. Complies to the 400kg standard with universal wall and floor mounting.

Suitable for low and furniture applications (excludes cistern)

- Adjustable in height (pan from 350 to 510mm), at the point of installation.
- All in one, low frame for wall hung WC pans & bidets.
- Adjustable feet.
- Wall fixing from 170 up to 325 mm, can be set sidelong.
- Thanks to its small width and depth, it can be fitted in furniture 400mm wide

Dual flush delivers water-saving reduced flush when lever is held down and full flush when lever is depressed and released

6/5/4 litre single flush also available

Approved by the European Water Label Scheme.

BEMIS Toilet Seats

Bemis Ultra-fix® a toilet seat fixing system that stays tight

Installing a toilet seat seems simple, but no matter how carefully installed somehow they always come loose. That's why we developed Ultra-Fix®, a patented hinge fixing system that will actually keep your toilet seat tight. Toilet seats repeatedly work loose for two reasons: Firstly, the mounting hole of the toilet pan is much larger than the bolt that goes through it, creating natural movement on the pan no matter how tight the seat is installed; Secondly, the toilet seat is not fully tightened enabling it to more easily loosen. The Bemis Ultra-Fix® hinge fixing system solves both of these problems. It is available on various toilet seat designs and for toilet ceramics that either require fixation from the bottom or top of the ceramic.
