DURABILITY

Built to last, all baths come with a 25 year guarantee

VALUE

The best price for a high quality product

COMFORT

In a range of sizes for maximum enjoyment

SIZE

Recognises the concern with space

Since Trojan was founded in 1975 the philosophy of the company has remained the same: produce a quality product using the best possible materials. Our skilled craftsmen take great pride in their work to ensure you have the best possible bathing experience.

Our obsession with quality is complemented by our policy of continual investment in new equipment. This combined approach means we are now one of the leading bath manufacturers in the world.

Why upgrade to Trojancast?

Trojan built a complete new factory to manufacture Trojancast products. Separate from all other production areas, the dedicated factory has been equipped with the latest technologies and is run by a team of specialist personnel who take pride in each and every Trojancast bath they produce.

Quality means everything

At each stage of production each individual bath is checked to ensure it reaches our high standards. Each individual employee that checks the bath stamps a label acknowledging they have fulfilled their job requirement. This ensures that the bath manufactured meets our quality criteria. This check label is placed on the back of the bath and remains with it through to delivery and installation.

Adding value at every stage

As well as the natural benefits of acrylic and the intensive reinforcement of the Trojancast process, all Trojancast baths come with our luxury fittings pack.

The guarantee on a Trojancast bath increases from our standard 25 years to 30 years, giving you extra peace of mind.

Substantial reinforcement

Trojancast is an intensive reinforcement process offered by Trojan to all our standard acrylic baths*. This reinforcement process results in each bath being incredibly strong and hard-wearing.

Insulating properties

Trojancast British racing green resin jacket covers the entire underside of the bath adding real strength and insulating properties. The additional bath thickness reduces the heat of the water being lost through the side walls, keeping your water hotter for longer.

Peace of mind

Trojancast results in a bath that has extra strength and rigidity – traditionally attributes only associated with cast iron baths. Ideal for larger families, hotels, B&Bs and rented accommodation.

Available on any range

Trojancast is available on all standard Trojan Baths* – we don't have a limited range, you can add it to almost any bath you choose!

* unless otherwise stated

Made in England

Our baths are made with pride in Yorkshire, England. We take control of all our processes giving you peace of mind. Trojancast should not be confused with imported baths claiming to have been through the same process and have the same properties. If it is not made in England it is not to the same standard.

Guaranteed

The guarantee on a Trojancast bath increases from our standard 25 years to 30 years. No imported bath will offer the same assurances.

Cascade Double Ended

385mm deep - No tap holes

1700 x 700mm	AB0581	£325.00

800mm	AB2635	£72.00

Advantages of waterproof over other types of bath panels

- Made with a combination of PVC and polyurea.
- 100% water resistant
- Will not crack or warp in wet or steamy environments.
- Considerably more rigid than acrylic.
- Completely formaldehyde free and is recyclable which means it is more eco-friendly.
- The lifespan is considerably more than that of MDF bath panels.
- Lighter and easier to cut than MDF.

When a wood based material like MDF is used, the surface is painted but over time the paint has a tendency to crack, which means without its protective covering, the MDF core quickly absorbs moisture causing swelling and softening which can also lead to a damp smell in the bathroom. Waterproof panels are also much lighter in weight than MDF.
