DI-BOND PANELS

Crafted from a resilient aluminium and plastic composite "sandwich," our panels are inherently 100% waterproof, ensuring they remain impervious to swelling, rust, or degradation over time, unlike plywood or MDF-based alternatives. What's more, our panels are proudly made in the UK and are fully recyclable. To further fortify our panels, we apply a durable, abrasion-resistant hard coat finish over the UV-cured printed image. This finish not only enhances protection but also preserves the vibrant colours of your panels while ensuring effortless cleaning.

ACRYLIC PANELS

Solid, reverse-printed, and 100% waterproof, our acrylic panels stand out for their durability and robustness. Crafted from a 3mm thick acrylic sheet, each panel features a UV-printed decorative sharp print on the back, safeguarded by a silver foil layer. This construction provides an easy-to-clean, waterproof surface with minimal risk of damage. The silver foil, securely placed behind the clear acrylic, ensures long-lasting protection. Our panels offer a high-quality, affordable bathroom solution with minimal maintenance required.

- S** → 100% waterproof
- T** → No more grout lines
- I** → Made in the UK
- E** → Fully recyclable
- E** → Easy to install
- N** → Anti-microbial
- E** → UV printed, no fading
- B** → Lightweight
- B** → Seamless patterns

WHAT IS SPLASHBAX?

The ultra-modern and grout-line free alternative to tiles, SPLASHBAX waterproof wall panels are ideal for use in shower enclosures, around and behind baths and even in your kitchen to create stunning feature walls. You'll discover a wide selection of shower wall panels designed to transform your indoor or outdoor space. Our waterproof panels are perfect for adding a touch of elegance and sophistication to any room. Upgrade your bathroom with our acrylic or di-bond shower wall panels, ensuring durability and easy maintenance with no grout lines. Stunning and modern designs are available for your space in various colours and patterns. Our wall panelling and coverings provide a seamless and sleek look for your interior. Let your creativity shine with our feature wall panels, designed to be a focal point in any room.

QUICK TO INSTALL

SPLASHBAX panels are ideal for DIY installation by skilled customers. With comprehensive fitting instructions included, installing our panels is a breeze. Covering large areas in one go, they offer a quicker and more cost-effective alternative to tiling. Thanks to their slim 3mm profile, SPLASHBAX panels can be applied over existing tiles if needed, providing a swift and waterproof makeover for any interior. You can easily cut and trim panels using a circular saw or jigsaw equipped with a fine or down cutter blade. For creating holes for pipes, simply use a flat 25mm drill bit or a hole saw bit. To activate your warranty use our adhesive and primer purchasable on our website.

EASY TO CLEAN

Our panels boast a flawlessly smooth surface, eliminating the hassle of dealing with mouldy grout or stubborn textures. Not only do our panels have anti-microbial properties they withstand chemicals, ensuring long-lasting beauty. Maintenance is a breeze: all it takes is a gentle wipe with a soft cloth and regular bathroom spray cleaner to keep your panels gleaming. It's as easy as that!

FOLLOW THE TREND

Making a real difference

Step into the world of SPLASHBAX, where we bring you the latest bathroom trends that redefine style and comfort. Our collection transcends boundaries, offering a diverse array of colours, patterns and motifs to suit every taste. From the soothing allure of geometrical pastels to the vibrant energy of bold tropical patterns and even the urban edge of pop graffiti icons, our range is as diverse as it is captivating.

Dive into a realm where pastels meet precision, where tropical paradise meets bold expression, and where graffiti art meets contemporary design.

At SPLASHBAX, we're not just setting trends, we're creating experiences that elevate the everyday bathroom into a sanctuary of style and individuality.

SPLASHBAX BENEFITS

FANTASTIC ALTERNATIVE TO TILES

CONTRACT DESIGNS

Explore our collection of 21 versatile tile and pattern designs listed in this catalogue, meticulously crafted to bring your bathroom vision to life. Inspired by traditional tiles, the beauty of nature, and natural materials, each design seamlessly fits various bathroom trends, helping you create your dream bathroom.

PREMIUM DESIGNS

At SPLASHBAX, our utmost priority is to provide you with an exceptional and personalised design service that caters to your unique needs. Our expert team will guide you through the entire process of creating shower panels that are tailor-made for your bathroom. Whether it's selecting the perfect images or ensuring the technical requirements such as file size and resolution are met, we've got you covered. With our expertise in Photoshop and vector design, we can retouch, modify, or even create images to the highest standards.

CUSTOM SIZES

While we offer common sizes online that suit most shower trays and bath areas, we also provide the flexibility to create any panel in the precise size you require, down to the millimetre.

EASY TO CLEAN

Keeping your panels sparkling is a breeze with just a soft cloth and regular bathroom spray cleaner. Say goodbye to arduous cleaning routines and welcome a bathroom that effortlessly maintains its allure. With our panels, you'll love living in a space that exudes cleanliness and durability, creating an environment that truly enhances your daily living experience.

NO MOULD, NO GROUT

At SPLASHBAX, we take pride in offering perfectly smooth panels that eliminate the hassle of grout maintenance and scrubbing textured surfaces. Our di-bond panels feature a durable semi-gloss hard coat finish, while our glass-like acrylic panels provide exceptional protection for the printed image on the back. Both finishes offer anti-microbial properties and chemical resistance, guaranteeing a pristine appearance that endures for years.

SPLASHBAX LAYOUTS

JUST CUT, FIT AND SHOWER

LAYOUT AND CHOICES

At SPLASHBAX, we've designed our panels to be perfectly suitable for DIY installation by competent customers. With comprehensive fitting instructions included, you'll have all the guidance you need to achieve a successful installation. What sets SPLASHBAX apart is the convenience of a single panel covering a large area, making the process quicker and often more cost-effective compared to traditional tiling methods. The thin 3mm and 5mm profile of our SPLASHBAX panels offers added flexibility, allowing you to apply them directly over existing tiling if desired. This means you can enjoy a swift and watertight bathroom makeover without the need for extensive tile removal. Our panels empower you to transform your space with ease, providing a hassle-free solution for DIY enthusiasts seeking convenience and efficiency.

SINGLE PANEL

Introducing our single panel shower solution, meticulously crafted to meet your specific requirements. Whether you need a panel for a shower with one side or a similar layout, our team will design and cut it precisely to your measurements.

TWO PANELS (LEFT OR RIGHT)

Featuring two sides on either the left or right, where the artwork seamlessly flows throughout both panels. The artwork will be thoughtfully aligned, creating a visually stunning and cohesive look that enhances the overall aesthetic of your shower. Seamless designs throughout multiple panels only available with our premium design range.

WRAP - AROUND MULTI PANELS

Discover our wrap-around multiple panel shower solution, specifically designed for layouts with three sides, perfect for walk-in showers or those surrounding a bath. Immerse yourself in a seamless and vibrant experience as the artwork seamlessly flows throughout all the panels. Seamless designs throughout multiple panels only available with our premium design range.

QUICK

INSTALLATION GUIDE

FOR COMPATIBILITY AND INSTALLATION SKILLS

1

Our panels can be installed on various surfaces, including plasterboard/drywall, ply, aqua board, plastered wall, and solid concrete/brick wall. The key is to prepare the surface correctly using our non-solvent primer, which seals the wall and enhances adhesion.

2

When measuring acrylic panels, leave a 3mm gap on all sides to accommodate panel expansion due to temperature changes. No expansion gap required for di-bond. For adjoining panels (side by side) allow a 3mm gap to ensure a watertight seal using our own recommended clear adhesive sealant creating a seamless finish.

3

Using our clear adhesive sealant is crucial to protect the reverse-printed image. We use UV ink, single white coat plus silver foil for added protection. Using a solvent based adhesive may damage the print. Our recommended solvent free primer and adhesive are essential for optimal installation and to activate your warranty.

4

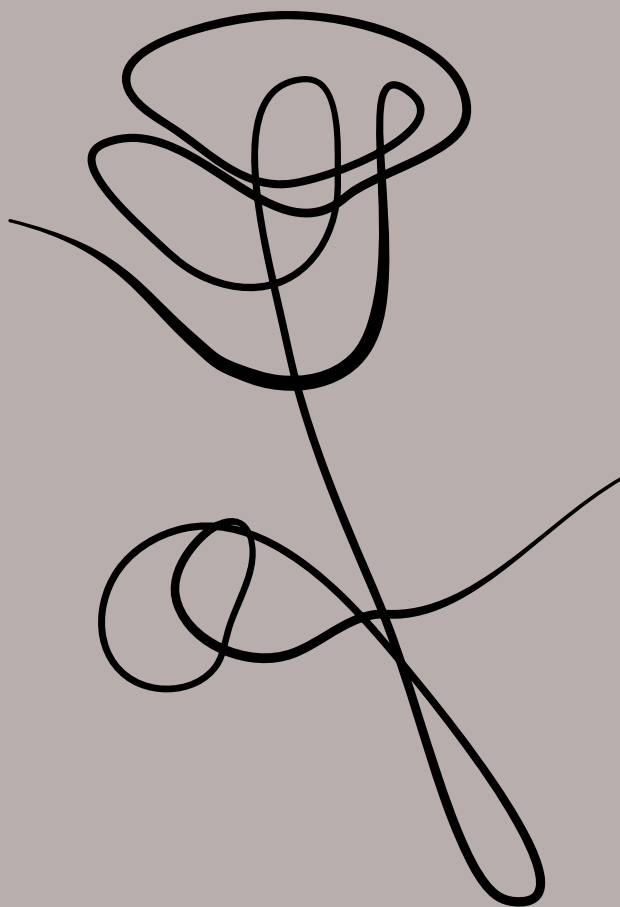

Apply adhesive in vertical lines at 100mm intervals. Press the panel onto the wall using a horizontal straight edge to ensure even spreading and eliminate trapped air. Due to its slight flexibility, acrylic may crack or shatter if mishandled. Follow these steps for a successful installation. Cut slowly on a solid base with a fine bladed jigsaw, circular saw or hand saw. The same applies for the di-bond. A metal fine blade would be the better option.

5
