

Bathroom Furniture Guide

When it comes to designing your bathroom, your choice of bathroom furniture can make a world of difference. Remember, your bathroom furniture should not only be functional but also complement your design preferences. Whether you have a spacious bathroom or a compact one, this comprehensive guide will help you navigate through various furniture options, styles, and tips to make the most of your space.

Wall Hung

An excellent choice for modern bathrooms, wall hung units offer elegant design while also maximising floor space, which can be especially useful in compact bathrooms. With flexibility in installation, you can set the vanity unit at a height that suits you and your family's comfort, ensuring a personalised and ergonomic experience.

Floorstanding

A classic choice that marries timeless aesthetics with practicality, floorstanding furniture works well in both traditional and contemporary bathrooms. Offering ample storage, one of the key benefits of choosing these units is the possibility of concealing unsightly plumbing work, which creates a clean and polished look for your bathroom.

Countertop

For those seeking to infuse modernity and sophistication into their bathroom design, countertop units are the perfect solution. Allowing you to create a truly personalised bathroom space, their defining feature is the washbasin sitting atop the countertop. Giving you the option to complement your design with different sizes, shapes and colours of basins.

WC Unit

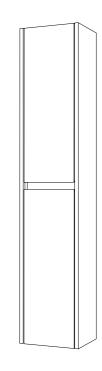

WC units are known for their clean and minimalist design, making them a popular choice for modern bathrooms. These units discreetly conceal unsightly pipework offering a sleek and practical solution for incorporating a back-to-wall toilet in your bathroom. Select a colour that matches your bathroom's style and cleverly add shelf space for your bathroom's finishing touches.

Cloakroom

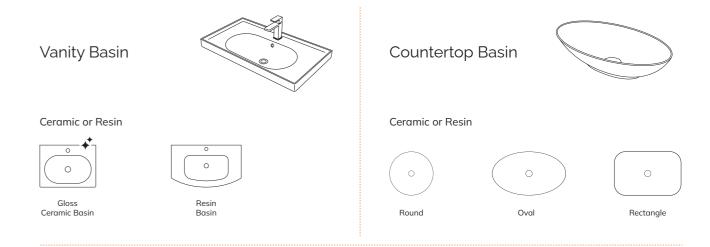

Ideal for smaller bathrooms, cloakroom units are specifically tailored to make the most of limited space while providing essential functionality. Combining a basin with storage, they provide a place to store toiletries and other bathroom essentials neatly. Despite their small size, cloakroom vanity units come in various styles and designs to complement your bathroom decor.

Wall Columns

When it comes to enhancing bathroom storage, wall column units prove to be a versatile and valuable addition.
Their vertical design draws the eye upward, creating an illusion of a taller and more refined space. Designed to maximise storage, in smaller rooms or bathrooms with limited floor area, they become lifesavers by efficiently using the often-underutilised vertical dimension.

BASINS

^{*} Ensure your wall can support the weight of wall hung units and that pipework runs through the wall for a clean finish.

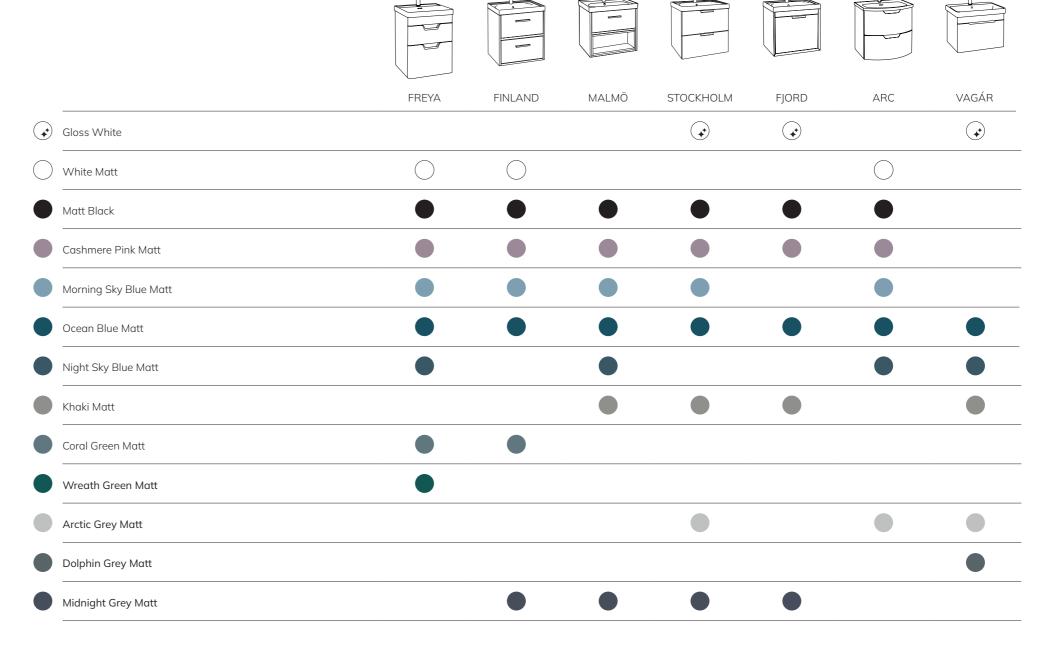

andinavian Collection

SONAS

SCANDINAVIAN COLLECTION

The SONAS Scandinavian Collection comprises seven distinct furniture ranges inspired by the natural landscape of the region. Together they represent clean, simple lines, and minimalism. Our designers have achieved both enhanced functionality and form.

Within the Scandinavian Collection explore the range of distinctive finishes and the alternative options of integrated or countertop basins with either gloss finish first class ceramics, or matt Solid Surface resin basins. The choice of muted dark hues, light neutral colours, and warm colours, creates a feeling that is warm and inviting.

12 ______ 13

FREYA

With a wide array of possibilities for your bathroom, FREYA is distinguished by its expansive colour range and superior design. Featuring elegant lines and generous wash space with a Solid Surface resin basin. Its inset metal angular handle delivers a sleek and subtle finish to your vanity unit. With FREYA you have the flexibility to achieve an end result characterised by high levels of customisation. FREYA's diverse range offers something for everyone, allowing you to create a bathroom with a unique look.

FINLAND

If you want to bring a timeless design element with practical applications into your bathroom, FINLAND is the perfect choice. Boasting rectangular, straight lines and framed front, FINLAND is styled with a front pull handle. Characterised by its symmetry, FINLAND displays pure, unembellished clean lines, a testament to the splendour of uncluttered design. Available with a ceramic basin or as a countertop unit, that is complemented by the SKÅL duo-tone vessel basins. Choose FINLAND and surround yourself with pure elegance.

FJORD

Sophistication made simple. FJORD is one embellished piece that is creatively designed and intricately crafted for a unique appeal. Its standout feature is an external drawer that cleverly conceals a discreet second internal drawer. This innovative hidden and fully extendable, internal drawer with soft-close system provides a unique solution for storage of your personal items. Striking the perfect balance between contemporary design and innovation, FJORD modern chamfered edge and choices from countertops and integrated ceramic basins will add character to your bathroom.

SKÅL

Elegant and bold – the stylish dual-tone SKÅL countertop basin sits proudly on your selected countertop vanity unit. The organic shapes and ultra-sleek profile are achieved by Solid Surface, a natural resin material, with a silky-smooth touch and matt finish. SKÅL Basin showcases a modern, cutting-edge aesthetic. With the resin material, SKÅL embraces new forms - round, oval and rectangular. The palette is chosen to coordinate with the colours in the Scandinavian furniture collection. SKÅL spectrum of shades adds a touch of sophistication to your bathroom. Complete your look with our range of contemporary Freestanding or Wall Mounted Basin Mixers.

Mirror Features

ENERGY EFFICIENT LED

(light-emitting diode) bulbs are more energy efficient and durable than standard light bulbs, often enabling up to 35,000 hours of use.

COLOUR TEMPERATURE CHANGE

A lower colour temperature produces a warmer, more relaxing glow while a higher colour temperature displays a cooler brighter light.

AMBIENT

Light is projected indirectly creating a multi sensory bathroom experience. The LED source emits a soft, diffused light that helps to create a warm and inviting atmosphere in the space.

DIRECT LIGHT

Designed with an LED light source facing outward, front-lit mirrors are particularly beneficial for tasks that require precision, such as shaving or makeup application.

MAINS SWITCH

These mirrors do not include a built in switch. Instead, they are designed to be connected to an external bathroom switch

TOUCH SWITCH

A mirror feature that allows you to control various functions of a mirror, such as lighting and defogging, with a simple touch on the control buttons.

DEMISTER

The integrated pad that gently warms the mirror's surface, preventing the build up of steam and condensation, leaving your mirror fog free.

SOFT CLOSE

Soft close technology allows cabinet doors to close softly and slowly, preventing them from slamming shut.

PORTRAIT OR LANDSCAPE

Allows you to customise the orientation of your mirror to suit your bathroom layout and design preferences.

ZONES

Bathrooms are divided into zones based on their proximity to water sources. These zones determine what types of appliances are allowed, and to what degree they need to be protected against water.

USB

USB ports provide a convenient charging solution for your devices such as smart phones and tablets. Allowing you to keep your gadgets powered up while you carry out your daily routine.

BLUETOOTH CONNECTIVITY

Wirelessly connect to other Bluetoothenabled devices and enjoy your favourite music while you prepare for the day.

INGRESS PROTECTION RATING

IP rating refers to the level of protection that electrical and electronic equipment, have against solid particles and water. An IP44 rating means your product is protected from solid particles over 1mm in size and low velocity water sprays.

Powered by Samsung LEDs, with high performance and high efficiency, they optimise energy consumption making the lighting more sustainable.

So go ahead, choose your mirror, and let the Echo range reflect the best version of you.

Sanitaryware Guide

BASINS

Semi Pedestal Basin

Semi Pedestal Basins are wall hung basins secured to a supporting wall. They conceal pipework that returns through the wall with a semi pedestal that does not reach the floor. These basins provide your bathroom with more floor space.

Full Pedestal Basin

Full pedestal basins are wall mounted basins attached to a supporting wall. The floor mounted pedestal conceals the pipework, creating a seamless and cohesive look for your space.

Semi Recessed Basin

A semi-recessed basin are partially embedded into a countertop or vanity unit. The front of the basin protrudes outward, while the rear part is recessed into the countertop. This optimizes countertop space, making them suitable for smaller bathrooms or compact layouts.

Countertop Basin

Countertop Basins positioned on top of a countertop unit or shelf are best paired with a tall basin tap, or wall mounted tap. The SONAS range of countertop basins are available in a variety of colours, shapes and sizes.

WCs

Close Coupled - Open Back

A Closed Coupled Open Back style WC has the pan and cistern closely coupled together with the necessary clearance space for your waste pipe. This provides more flexibility for your pipework and can be easily accommodated within most bathrooms.

Close Coupled - Fully Shrouded

A Closed Coupled Fully Shrouded toilet has the pan and cistern closely coupled together. In this design, the pan is seen to meet with your wall. This allows you to conceal your bathroom pipework.

Back To Wall

Back To Wall toilets are a great space saving technique. The main difference between this style and the Closed Coupled toilet is that the cistern is concealed behind your bathroom wall, or placed in a furniture WC unit.

Wall Hung

Wall hung toilets are installed by mounting them on the wall, resulting in a more spacious bathroom layout. To install them, a sturdy fast fix frame is placed behind the wall, which can support up to 400kg of weight. The flushing mechanisms of these toilets can be conveniently accessed through a push plate.

Our Brushed Gold and Brushed Nickel flush plate finishes are applied using Physical Vapour Deposition (PVD). This is a technology that creates a thin film on the surface, giving them superior durability and making them more resistant to wear & tear.

SHORT PROJECTION

These WCs are the perfect solution if you are short on space. SONAS Short Projection WCs allow you to maximise your space without compromising on quality and functionality.

COMFORT HEIGHT

SONAS Comfort Height WCs are an additional 40mm to 60mm higher than standard height toilets. The additional elevation offers a more comfortable sitting position.

RIMLESS

Instead of water flowing into the bowl around the rim, a direct flush technique shoots water around the edge of a smooth pan. The absence of a rim means significantly easier cleaning, enhanced hygiene, and improved flushing performance.

QUICK RELEASE

Designed for easy and efficient cleaning and maintenance, quick release seats feature a mechanism that allows for swift removal and reattachment without the need for tools. By pressing the button located on the hinges of the seat, it can be effortlessly taken off the toilet for thorough cleaning, reaching areas that are usually challenging to access.

SOFT CLOSE

Soft close toilet seats feature a mechanism that enables them to close gradually and quietly, eliminating the common issue of seats slamming shut. These seats offer a noise-free and controlled descent, enhancing overall bathroom comfort.

114

ECO FLUSH

An innovative flushing system, with adjustable flush volumes between 2.6 up to 4.5ltrs. These toilets are sustainably conscious by reducing water consumption and having a positive impact on the environment.

EASY ACCESS WATER INLET

This refers to toilets that have a concealed waste outlet and exposed water inlet connection.
This allows for quick and straightforward connection or disconnection of the water inlet, making installation and maintenance easier.

115

AVANTI

Designed to be interchangeable and work across multiple ranges, AVANTI coloured thin-edge ceramic basin is more than just a practical vessel for everyday use. Available in eight colours, AVANTI's soft curves and classy style are the defining characteristics of this collection.

Crafted from the highest quality material, this elegant countertop basin is built to last. AVANTI evokes a feeling of refinement and is really for anyone looking for something extra special to complement their bathroom.

Tap Guide

BASIN

Basin Mixer

The basin mixer cleverly combines hot and cold water into an individual stream. This design ensures easy control of both your temperature and your flow using only a single lever.

Cloakroom Basin Mixer

The cloakroom is a more compact version of the basin mixer. These taps can be paired with our stunning range of cloakroom vanity units and are perfect for smaller spaces.

Basin Taps

Mounted onto the basin and sold as a pair, basin taps have separate taps for your hot and cold water. Basin taps are available in both traditional and modern styles.

Wall Mounted Basin Mixer

Wall mounted taps add a touch of luxury to your bathroom. Fixed to your bathroom wall, these taps offer a seamless finish, and can be used as an alternative to a freestanding mixer where a countertop basin is used.

Freestanding Basin Mixer

A stylish, elegant and contemporary tap choice for countertop basins without a tap hole. Freestanding taps are available in rounded or angular styles and come in chrome, matt black, brushed gold and brushed nickel finishes.

Standard & cloakroom basin mixers include a click clack colour coordinated basin waste. Before purchasing taps and showers always ensure your site conditions meet the minimum operating pressure requirements. Please consult your plumber.

BATH

Bath Shower Mixer

Deck mounted onto your bath or wall mounted above the bath. An inbuilt diverter allows you to switch between the bath filler or handset outlet. The inclusion of an extendable handheld shower head offers a full bathing or showering experience.

4 Hole Bath Shower Mixer

Deck mounted on to the bath with separate hot and cold controls with a diverter to switch to a convenient pull-out shower handset. 4 hole mixers requires an additional bath filling device such as a wall spout or overflow filler.

Thermostatic Bath Shower Mixer

Available in deck or wall-mounted options, thermostatic bath shower mixers offer exceptional temperature stability preventing scalding and burning incidents. The inbuilt diverter allows the user to choose between the bath filler and slide rail kit or shower handset.

Floorstanding Bath Shower Mixer

Ideal for freestanding baths, these taps allow flexibility when choosing your bath position. Available in a range of stunning finishes and styles from contemporary to traditional. These taps are a first fix consideration. Please consult with your bathroom installer.

Deck Mounted Bath Filler

Mounted on the bath , they mix hot and cold water to achieve your preferred bath water temperature. Deck mounted bath fillers are available in a range of stunning finishes and styles from contemporary to traditional.

Spout Filler

Designed for baths without pre-drilled tap holes or for freestanding baths, spout taps are ideal for creating a neat and clutter-free solution. Spout bath fillers are available in a choice of designs and finishes. See Page 199

Overflow Filler

Overflow bath fillers allows you to fill your bath from a device mounted at the overflow. Overflow bath fillers can be used as an intelligent space-saving solution. See Page 199

Waterfall Bath Filler

These are a contemporary alternative to a conventional bath filler. Adding wall mounted fillers can effect a sleek and streamlined look and feel to your bathroom. See Page 199

oathrooms.co.uk

Tap Features

COLD START TECHNOLOGY

Cold start basin mixers promote the use of cold water in daily activities that don't require hot water, reducing carbon emissions associated with water heating and preventing wastage. Only cold water is delivered when the lever is in the centre position.

Our Brushed Gold and Brushed Nickel finishes are applied using Physical Vapour Deposition (PVD). This is a technology that that creates a thin film on the surface of our taps, giving them superior durability and making them more resistant to wear & tear.

TEMPERATURE LIMITER

The basin mixers fitted with this feature can be pre-set (installation optional) to limit the maximum temperature in selectable stops. This will help save energy and protect vulnerable users especially in environments where hot water can reach dangerously high temperatures.

Our taps come with extended warranty, providing peace of mind and protection for your investment.

Taps with a minimum operating pressure of 0.2 bar will operate without the need of a booster pump. They only require a 2 metre vertical distance between the water source (water storage tank) and the tap outlet.

Taps with a minimum operating pressure of 0.5 bar and above require a booster pump that increases water pressure and flow.

Our products registered with the Unified Water Label help the end user make an informed decision, when choosing bathroom products. The label offers clear, concise and easy to understand messaging about water and energy consumption.

WRAS approved products undergo rigorous testing to assess their durability and performance. By using these approved products, clients can minimize the risk of leaks and failures, preventing potential damage.

Before purchasing taps and showers always ensure your site conditions meet the minimum operating pressure requirements. Please consult your plumber.
