

NURSE LIFE CARE PLANNING

OVERVIEW FOR CONSIDERATION WHEN CONTRACTING FOR A LIFE CARE PLAN

Why use a Nurse Life Care Plan?

Contracting for a Life Care Plan is a key component to developing a solid defense in cases involving a wide range of catastrophic injuries, debilitating disabilities or long-term care situations.

Commonly Life Care Plans detail the current and future medical, psychological, educational, vocational and living needs with annual and lifetime cost projections.

Life Care Plans can be structured differently. Specifically, contracted Nurse Life Care Plans not only provide the familiar detailed plan, but also has significant added value and perspective of a health care expert – The Nurse.

Using a Registered Nurse in writing a Life Care Plan is highly beneficial as the nurse is able, *and qualified by license*, to assess, diagnose and plan the expected outcomes for each individual; each situation. The Nurse Life Care Planner has unique extended experience, knowledge and education relevant to the Life Care Planning process. Nurses are able to include strategies that address each diagnosis; promoting and restoring health, preventing illness, injury or disease. The nurse uses the Scopes and Standards of Practice, established by the American Nurses Association, along with the scientific process to develop an individualized plan of care.

Contracting with a Nurse Life Care Planner adds to the professional depth of the defense team and ultimately provides a higher quality product – **The Nurse Life Care Plan**.
