## ELECTION RIGGING RESPONSE ACT

# What is Congressional redistricting?

The U.S. Constitution mandates a census every ten years to count every person living in the United States, and this count plays a key role in determining political representation and allocating federal resources.

**Apportionment** is the process of dividing the 435 memberships, or seats, in the U.S. House of Representatives among the 50 states based on the apportionment population counts from the decennial census.

**Redistricting** is a process to redraw Congressional districts after the decennial census.

## Yes vote means:

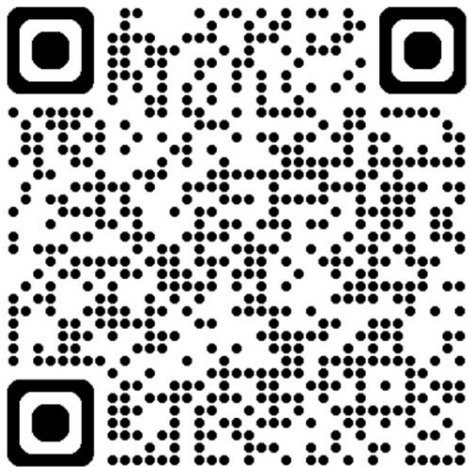

California will use Democratic leaning Congressional map in 2026, 2028, and 2030 elections:

- To neutralize the Republican leaning Congressional map approved in TX
- To give Dems a fighting chance to get House majority in 2026
- To help stop the Trump takeover
- After the 2030 census redistricting by Independent Citizens Commission will resume

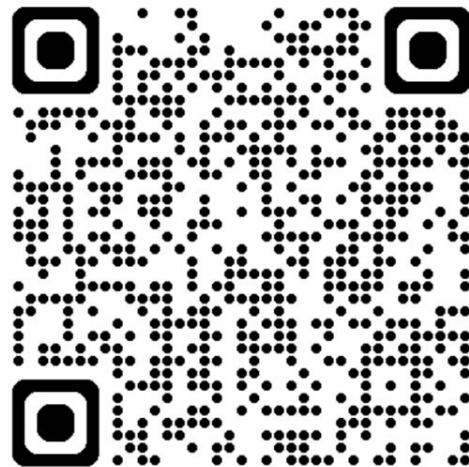

Measure reaffirms California's commitment to Independent Citizens Commission in all 50 states.
