CGM APRIMA

EHR and Practice Management

APRIMA EHR from CompuGroup Medical

- Ongoing ONC 2015 Edition Certification with continued 21st Century Cures Act Compliance
- Compliance and features specific to other regulatory requirements including:
  Primary Care First
  Pre-validated by NCQA for PCMH® (Patient-Centered Medical Home)
  Built in FQHC/RHC features including UB billing and robust UDS reporting
  Ready for the January 1st, 2023 Appropriate Use Criteria Program ("AUC") reporting Requirements

o A modern platform which uses the latest technology and architecture standards, smartphone and tablet mobile application enablement, and even a version you can run in disconnected mode should you see patients in home care or other settings with bad internet connectivity

o Flexible deployment choices: Available on-premise or cloud-hosting & backups.

o Incredible and highly adaptable documentation capabilities that help you note quickly and accurately without technology being a barrier to your patient relationship. We have even added some key LYTEC MD features such as the "dot codes" that you know and love

o Advanced care capabilities including integrated Chronic Care Management, population health management, and HCC risk scoring

o Integrated Patient Portal including a 3rd party access portal very similar to the Consultant View that was so popular in the old Webview portal

o Integrated Faxing and Document Management

o Integrated CQM reporting

o Robust interoperability with thousands of connections to Lab, and other diagnostics, HIEs such as CommonWell, and even many ACO data feeds

And much more. See the Aprima demo today!
