

## **Quality, Health, Safety and Environmental (QHSE) Policy**

### **New Green Industrial**

At New Green Industrial, we support the renewable energy sector by providing trusted field services for wind turbines, including maintenance, complex repairs, large correctives, and operational support. Our work is driven by a clear purpose: to contribute to a cleaner, more sustainable future by ensuring the efficiency, safety, and longevity of wind turbine infrastructure.

What sets us apart is our leadership and foundation in real field experience. With over 40 years of combined hands-on wind industry expertise, our senior management understands the realities of turbine operations because we have lived them. From working at heights to managing demanding site conditions and strict deadlines, we bring practical, field-proven knowledge into every project we deliver.

We are committed to doing the work right every time. We show up prepared, we work safely, and we never cut corners on quality. Safety is fundamental to how we operate and is integrated into every task, alongside trust, reliability, communication, and accountability.

### **Commitments**

In order to fulfill this policy, New Green Industrial LLC commits to:

- Deliver wind turbine field services that consistently meet customer, statutory, regulatory, contractual, and other applicable requirements, ensuring reliability, performance, and customer satisfaction in all maintenance, repair, and operational support activities.
- Maintain and continually improve an integrated QHSE Management System aligned with ISO 9001, ISO 14001, and ISO 45001, ensuring it remains effective, practical, and aligned with our field-based operations and strategic direction.
- Protect the environment by promoting sustainable practices across all operations, including preventive maintenance, corrective repairs, and component replacements, while minimizing environmental impact and preventing pollution.
- Provide safe and healthy working conditions for all personnel, with particular attention to high-risk wind turbine environments, including working at heights, electrical systems, hydraulic systems, confined spaces, and remote site operations.
- Identify, assess, and control hazards and occupational health and safety risks through proactive planning, field-based risk assessment, job hazard analysis, and disciplined execution of work activities.
- Promote a strong safety and quality culture by encouraging consultation, communication, and active participation of employees and subcontractors in QHSE matters and continuous improvement initiatives.

- Ensure that all personnel are competent, trained, and aware of their responsibilities, reflecting our belief that experienced, well-prepared people are essential to safe and successful field operations.
- Establish, monitor, and review measurable QHSE objectives that drive continuous improvement in safety performance, service quality, environmental protection, and client confidence.

## **Our Mission**

Our mission is to drive the growth of renewable energy by ensuring the efficiency, safety, and longevity of wind turbine infrastructure. We are committed to helping our clients maximize turbine performance and deliver solutions that contribute to a cleaner, more sustainable future.

## **Our Vision**

We believe in the power of green energy and its potential to transform the future. Our team of dedicated professionals is committed to providing top-notch services that not only meet, but exceed industry standards. We recognize the critical role wind turbines play in generating sustainable energy, and we strive to be at the forefront of maintaining and building these vital structures. Every decision we make is guided by a dedication to safety, quality, and a passion for a greener tomorrow.

## **Our Values**

### **Sustainability:**

We are dedicated to promoting and implementing environmentally friendly practices in every aspect of our work.

### **Quality:**

We strive for excellence in every project, ensuring our services are reliable, efficient, and of the highest standard.

### **Innovation:**

We embrace new methods and best practices to continuously improve how we execute wind turbine services, ensuring safe, efficient, and high-quality results.

### **Safety:**

The safety of our team, the communities we serve, and the environment is paramount. We adhere to strict safety protocols to ensure a secure work environment and minimize environmental impact.

This policy reflects the foundation of New Green Industrial LLC and our commitment to excellence in everything we do. It is communicated, understood, and applied at all levels of the organization and is made available to relevant interested parties as appropriate.

We are committed to building long-term partnerships through trust, performance, and shared dedication to advancing renewable energy. Together, we aim to deliver meaningful impact and support a sustainable energy future.
