

RUPEDL W-501

DPF System Cleaner

RUPEDL W-501 Catalytic Converter/DPF System Cleaner

Catclytic converter/DPF Syetem cleaner is a totally new concentrated formula, In-depth research on the quality of Taiwan diesel, carefully deployed, Safe and completely removal of carbon sludge from combustion chamber, diesel high pressure pump and colloid carbon of injector.

Reduce the discharge of carbon particles (black smoke). Prolong the usage lifespan of diesel particle filter, lubricating and protect the diesel high pressure pump, injector and reduce wear and tear.

In-depth research, careful adjustment and development against the high pressure diesel pump and piezoelectric type of diesel injector of new generation common-rail diesel engine.

This is safe to clean the carbon sludge of high pressure diesel pump and piezoelectric type of diesel injector.

To remove stubborn carbon deposit in combustion chamber, recover back the combustion efficiency, restore back engine power.

Lubrication and protection of high pressure diesel pump and piezoelectric type of diesel injector and extend the life span.
