

RUPEDL W-725 GRAPHENE

Engine oil additives

RUPEDL W-725 GRAPHENE Engine oil additives

W-725 is an innovative composite nanoparticle product. It is the strongest material known today. It is compounded with the most advanced graphene particle base oil and dispersant.

The quality and performance are quite stable. It has anti-wear, lubrication, and Antioxidant, anticorrosive and other functions.

Three major features:

- I. Effectively reduce friction and anti-wear .**
- II. Increase motivation.**
- III. Reduce engine oil consumption.**
- IV. Reduce engine noise.**
- V. Protect the engine during cold start.**
- VI. Truly achieve "zero wear" on the engine.**
