

## UniqueTek Offers Toolhead Clamp Kit for Dillon 550 and 650 Presses

UniqueTek's new Toolhead Clamp Kit for Dillon Precision 550/650 reloading presses eliminates the loose fit between toolhead and press frame, providing better alignment and reducing overall length variation in loaded cartridges. Toolhead movement is also eliminated when the press is cycled. No modifications are made to the press frame itself, allowing you to continue using standard toolheads with the original toolhead pins.

"This is our latest product

for Dillon Precision reloading presses," says Lee Love, UniqueTek's product design engineer. "We plan to have products to enhance other reloading presses in the near future."

The kit features Grade 8 alloy steel clamp bolts with a cryo-film moly antiseize coating, along with stainless steel thread inserts. The new kit lists at \$29.95 but is currently on sale for \$24.95.

## BROWNELLS LEWIS LEAD REMOVER FOR SHOTGUNS

Brownells has expanded its selection of Lewis Lead Removers to include models for 12- and 20-gauge shotguns. Originally designed to remove lead from pistol bores, the Lewis Lead Remover is known for restoring accuracy. It also improves functioning by removing lead residue from bores and chambers.

"When we purchased the Lewis Lead Remover in 2003, we knew it had the potential to work in more types of guns than just pistols," said Pete Brownell, vice president of Brownells. "Its effectiveness at cleaning pistol bores has been proven over more than 50 years of use by gunsmiths nationwide. From what we've seen in testing, it works every bit as well in shotguns. It easily removes not only lead fouling but also plastic wad buildup from barrel bores."

The Lewis Lead Remover uses

specially woven brass patches to mechanically remove lead buildup that accumulates in the barrel during shooting. It does this without damaging the bore. The system designed for shotguns threads onto common shotgun cleaning rods with 5/16"-27 tpi female threads. Its proprietary cone and rubber tip provide the correct tension for maximum cleaning efficiency as the brass patch presses against the bore.

Both 12- and 20-gauge Lewis Lead Remover shotgun kits are available for \$10.97. For more information, contact Brownells, Dept. HL, 200 S. Front Street, Montezuma IA 50171-1000; 1-800-741-0015, for orders; or visit online at: [www.brownells.com](http://www.brownells.com).
