

Step 2: Remove the spent primer cup.

Step 3: Remove the primer seater assembly Step 4: Remove punch support bracket.

Step 5: Install the desired swage pin onto the mounting plate and attach with the e-clip.

Note: Make sure that the e-clip in installed on the topside of the mounting plate.

Step 6. Install the \$650 onto the press with the supplied screws and do not tighten.

Step 7: Lower the platform assembly to ensure correct alignment with the \$650, rotary primer disk and the shellplate.

Step 8: Tighten the exposed screw on the \$650 then raise the platform and tighten the second screw. Lower the platform and double check for proper alignment.

- While swaging the brass gently push forward on the press handle to fully seat the swage pin into the brass.
- Do Not use excessive force as this may damage the brass case.
