

## A Better Night's Sleep

I recently had a close relative living out of state diagnosed with dementia and chose to transfer her to closer to my home. While there are many challenges during the Covid-19 era, I was fortunate to find a wonderful care management service that made the situation very smooth and easy. Aimee Gustitis is a registered nurse who worked in Memory Care, Assisted Living and Skilled Nursing and decided to provide the service full-time.

Her website explains the process and her rates are very reasonable. She was always available to answer questions and reassure us. We found a lovely Memory Care community with caring staff about 20 minutes away and my relative is now very happy in her new home. I am also getting a much better night's sleep! I offer my strongest endorsement to Aimee Gustitis and her wonderful, compassionate service for this difficult emotional process.

Best regards, Ron Krilla
