

Engineering Services

We specialize in delivering smart automation and digitalization projects for manufacturers. We aim to be your trusted partner for plant digitalization, from the hardware, sensors and actuators all the way through to MES and ERP integrations.

How We Help

- "We want to see live production data from anywhere"* → **Shop Floor Connectivity and Dashboarding**
- "We get human errors introduced to lots of manual spreadsheets"* → **Automatic Data Capture and Reporting**
- "Our SCADA system is clunky and hard for our operators to use"* → **SCADA Upgrades and Modernization**
- "Our energy bill keeps going up and we want to get on top of it"* → **Energy Monitoring System Projects**
- "We don't trust the data we are collecting right now"* → **Plant Data Reviews and Consolidation, UNS Projects**
- "We don't have the capacity to deliver all our projects in-house"* → **Engineering/Digitalization Team Augmentation**

Where We Fit in

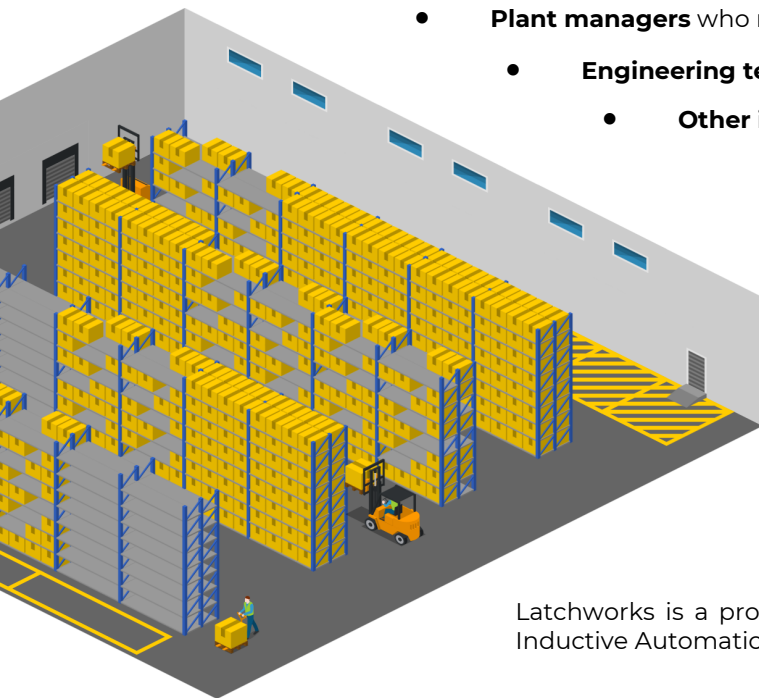

- Helping** teams modernize outdated PLC, SCADA & HMI systems.
- Connecting** machines and dashboards for real-time visibility.
- Integrating** data and bridging the gap between Operations and IT.
- Troubleshooting** difficult automation or network issues.
- Building** lightweight tools for tracking production and performance.
- Auditing** data and connectivity through Pathfinder Assessments.
- Advising** on Digitalization strategy and technology selection.
- Supporting** project scoping, vendor coordination and project delivery.

How We Work

We're flexible. We can join your existing team, lead standalone projects, or act as your trusted integration partner. We work with:

- **Plant managers** who need problems fixed
- **Engineering teams** that need extra hands
- **Other integrators** and independent facilities

Working With Us

We aim to be a long-term partner for manufacturers who value clear thinking, honest advice, and practical solutions. Whether you need full project delivery, extra support for an internal team, or troubleshooting support for a single issue, we are here to adapt to what works best for you. If you have a problem to solve or a project to progress, please, get in touch!

Latchworks is a proud integration partner of Inductive Automation's Ignition platform.
