

COLLABUSHARE JOB DESCRIPTION

POSITION:

Senior Developer

ABOUT THE POSITION:

Collabushare is a productivity software that helps accountants become trusted advisors through collaboration and knowledge sharing. We exist to keep people in parallel with technology.

Collabushare provides accountants the tools needed to not only stay ahead of, but forge a new path forward, redefining the industry. We are our customer's trusted, value-added technology partner.

Our developers see the power technology plays in changing the world, and the role Collabushare plays in making our customers' lives better. Thought leaders and innovators at heart, our developers are always on the hunt for ways to uphold our mission and make Collabushare a leader in innovation.

The selected senior developer will work alongside our leadership team to drive the vision and implementation of Collabushare Version 2.0, execution of our MVP as well as the development of additional modules. This is a full-time position.

PRIMARY RESPONSIBILITIES:

- Drive product development and commercialization along with leadership team
- Adhere to high-quality development principles while delivering solutions on-time and on-budget
- Collaborate with other software developers, business analysts and software architects to plan, design, develop, test, and maintain web-based software
- Assist in the collection and documentation of user's requirements, development of user stories, estimates and work plans
- Design, develop, and unit test applications in accordance with established standards
- Project management skills including self-discipline and management, prioritization and effective decision making
- Must be able to work independently and with a team
- Must be interested in working at a growing start-up in a fast-paced environment

JOB QUALIFICATIONS:

- 6+ years of experience developing web-based technologies
 - Ruby on Rails experience required
 - Significant experience with Ruby 3.0+ on Rails 6.0+
- Understands how to write efficient code
- Writes automated tests for all new code by default, using gems such as RSpec
- Good front-end knowledge including HTML5, CSS, and JavaScript
- Uses Git for source code management
- Experienced with Tailwind CSS
- Ensures cross-browser compatibility (Firefox, IE, Safari, Chrome)
- Knowledge and use of RESTful coding

ADDITIONAL QUALIFICATIONS:

- Knowledge of PostgreSQL and database optimization (indexing, efficient queries, etc).
- Linux server administration knowledge.
- Interest in emerging AI technology. Including Open AI, LLMs, Vector Databases, etc.

PERSONAL CHARACTERISTICS:

- Solutions Oriented – Someone willing to roll up their sleeves, identify a problem, and propose a solution
- Hungry/Tenacious – Does whatever it takes to accomplish a goal
- Mission-aligned – Always pushing the boundaries to keep people in parallel with technology

OTHER INFORMATION:

- Location: Remote / North America
- Compensation: Competitive
