DNA TEST CERTIFICATE

Progressive Retinal Atrophy (PRCD type)

Registered Name: **Jazzy's Stay Puft @QA**
Registration Number: [REDACTED]
Breed: **Poodle (Miniature)**
Microchip Number: [REDACTED]
Date of Birth: **10/04/2024**

Customer Name: **Catherine Nelson**
Address: [REDACTED]
City: **Yukon**
Postcode: [REDACTED]
Country: **United States**

Sample Type: **Swab**
ID Verification: **None**
Sample Received: **21/01/2025**
Test Code*: **PRA-PRCD**
Sample Tested: **23/01/2025**
Authorised By: **James Oliver, Technician**

** This test directly detects the DNA variant reportedly associated with Progressive Retinal Atrophy (PRCD type)*

DNA Test Result: **CLEAR**

Explanation of DNA Test Result

Progressive Retinal Atrophy is Autosomal Recessive. "Clear" dogs have two normal copies of DNA. Clear dogs will not develop Progressive Retinal Atrophy as a result of the PRCD mutation, although we cannot exclude the possibility they might develop Progressive Retinal Atrophy due to other mutations they might carry that are not detected by this test.

Result only applies to the sample supplied.
Certificate shall not be reproduced except in full, with written approval of the laboratory.
