

Living Jewelry Care Card

Thank you for choosing Unjaided Designs. To ensure the longevity of your special living jewelry piece, please follow these care instructions:

Watering:

Virtually self-sustaining, watering your living jewelry is easy and minimal. Add 2-3 drops of water using a spray bottle or turkey baster whenever the moss starts to look dry. Keeping the cork stopper in will help keep the moss wet and humid longer. Use filtered or spring water to keep the glass clean from water spots.

Store properly:

Keep your jewelry sitting upright and out of direct light. Moss grows best in lower light and humid conditions. It will fry or dry up faster if kept in a bright location and without its cork stopper left in.

Maintenance:

Since mosses are living organisms, sometimes things go wrong. The best way to prevent this is checking in on your jewelry from time to time, keeping its lid on and keeping it away from excessive heat or light.

Remember, with proper care, your jewelry will continue to grow and flourish for years to come!
