

# CIGOA Corporate Membership

SHOW YOUR EMPLOYEES AND PARTNERS THAT YOUR ORGANIZATION IS SERIOUS ABOUT INFORMATION GOVERNANCE

In today's digitized world where remote work is commonplace, Information Governance (IG) is more important—and challenging—than ever. A commitment to IG means a commitment to information risk management, where organizations seek to secure, control and optimize their information.

With **CIGO Association corporate membership**, your organization will gain:

- **Resources** — Members-only surveys, training, tools and discounts to educate your staff and reduce information risk
- **Instant Connections** — Network through our monthly Meet n Greet, curated email list of 12,000+ professionals working in IG, Privacy, Security, Data Governance & eDiscovery
- **Visibility** — Demonstrate to your employees, partners, and customers that IG and data protection are important and that you actively manage risk

## The Value of Corporate Membership

**Information Governance** goes beyond cybersecurity and privacy, and organizations that can demonstrate competence in IG are more highly valued. A CIGOA corporate membership shows your customers and employees that you proactively manage information risk and have a high regard for the protection of your data and intellectual property.

“I expect really big changes around labeling sensitive data, focusing on data minimization, and data mapping. We are ready for a key result area for privacy, information governance, and for legal this year based on these changes coming fast. Mitigating all those risks associated with the data retained is what it takes to run your business.”

*Suzanne DiCicco – Director of IG, SEI*
