# THE MIRACLE FRUIT BERRY HIMALAYAN SEA BUCKTHORN

Sea-Buckthorn can be personified as gold which is completely natural. It is rich in 190 biologically active compounds which being water soluble are not stored by human body, but are needed on daily basis. These compounds include all the major vitamins, minerals, omega 3,6,9 & rarest omega 7, flavonoids, antioxidants, 42 lipids, 21 amino acids, organic acids, folic acids and tocopherols which makes it a Wonder Berry!

## Key Nutrients Of Sea-Buckthorn

**RARE  
OMEGA 7**

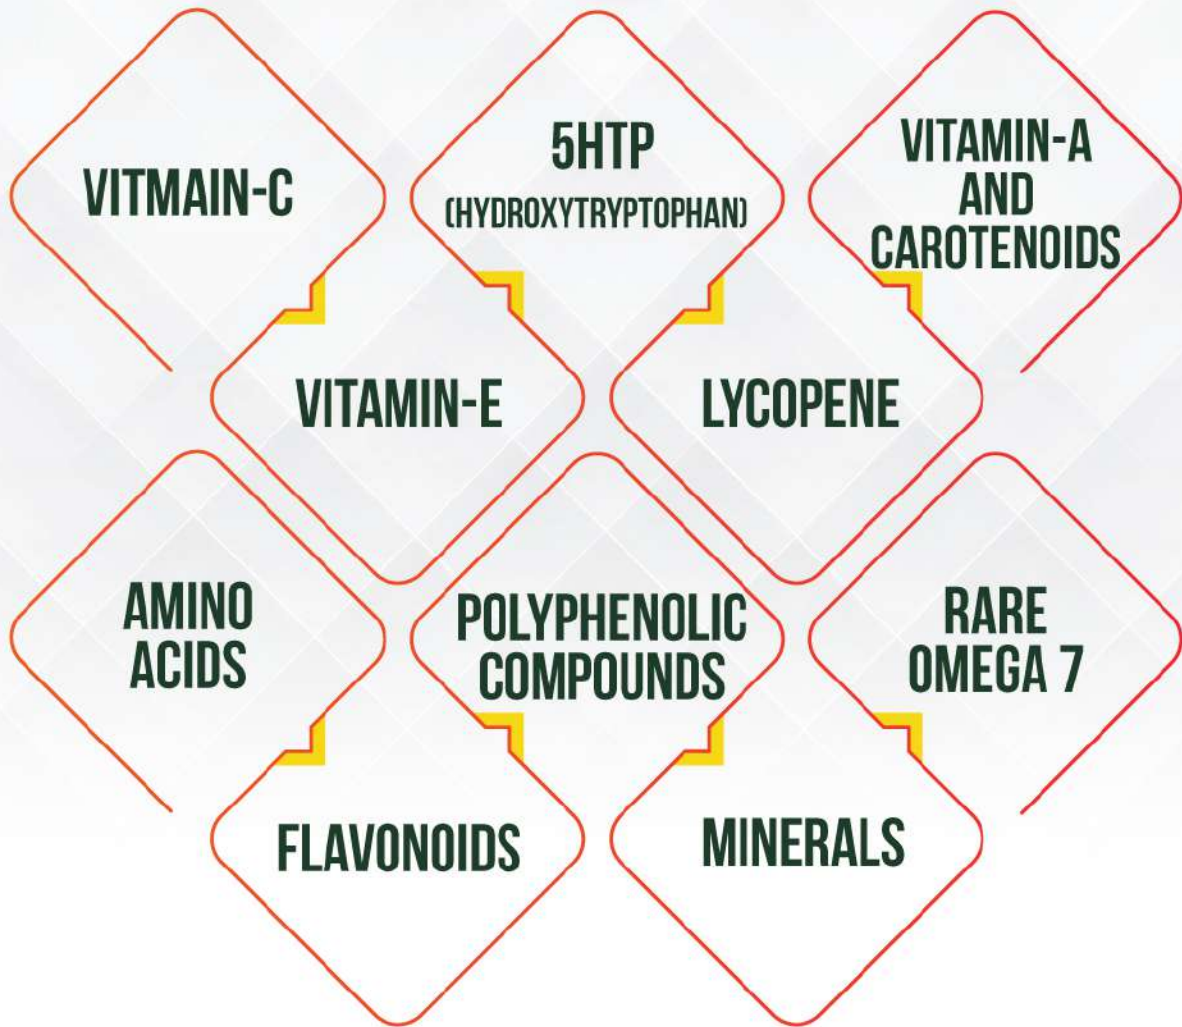

**ESSENTIAL  
FATTY ACIDS  
OMEGA-  
3, 6 & 9**

**RICH  
SOURCE OF  
ANTIOXIDANTS**

**SUPER OXIDE  
DISMUTASE**

**VITAMIN-B  
COMPLEX**

## **BENEFITS**

Fatty acids Omega 3, 6,7 & 9 maintain good cardiovascular health.

Vitamin-E and Omega 7 promotes healthy skin,hair and nails.

Vitamin-C and antioxidants promotes healthy immune system and cellular.

Rejuvenation by eliminating free radicals from the body.

Vitamin-A ,enhances eye health for better vision.

Amino acids support healthy digestive system.

Functioning and protein synthesis.

It helps in prevention of heart disease and high blood pressure.

It is helpful for proper brain function and good eye vision.

It improves hydration and elasticity in skin thereby preventing wrinkles.

Antioxidants guard against free radicals and prevent cellular damage.

It helps in muscular dev. & increases the strength & efficiency of the muscles.

This also regulates androgen production thereby reducing acne.

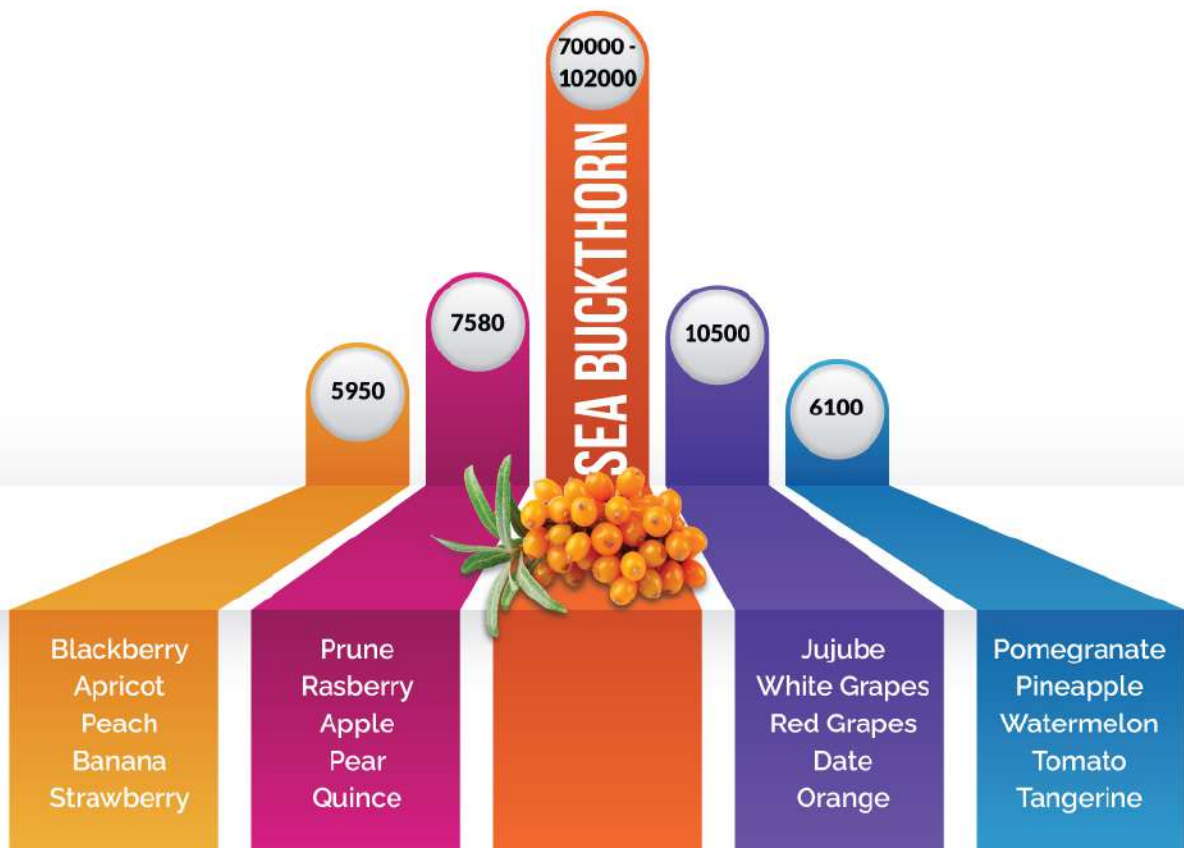

It helps to reduce the inflammation of skin in psoriasis and eczema.

It is also beneficial for weight control.

It also promotes effective and healthy growth of skin, hair and nails.

### *Why DO We Need Antioxidants?*

When our body cells use oxygen, they naturally produce free radicals. Smoking, alcohol intake, poor digestive system, pollution, sun rays, mobile rays, unbalanced diet and stress increases the incidence of free radicals. Free radicals damage the cell, which is known as oxidative stress. This further proves fatal for our cells and consequently our health deteriorates. Antioxidants neutralize free radicals and provide protection from cell damage. If we don't neutralize the free radicals then damage of cells and alteration of cells genetic qualities can be fatal. Antioxidants are required to avoid such damage. ORAC value (**Oxygen Radical Absorbance Capacity**) is the antioxidant capacity of any food.
