# VIRTUAL CASH CONTROLLER

**Ideal solution for public libraries, universities, hospitals, law offices, government facilities…….**

*Control access and integrate your operation…*

## Copy & Print Control

Virtual Cash Controller (VCC) works with leading market software products to control copier, printer, fax and microfilm output in offices, schools and library environments. The VCC plugs into a network hub or switch to communicate with your central accounts database which tracks activity at all your office machines.

Patrons key their account number in to the VCC or swipe virtually any ABA magnetic stripe card (student ID, library card, grocery store card, even proximity card). This enables the copier or other device and charges the job to the patron's account.

## Benefits

### Secure
Patrons are guaranteed secure access to unattended devices

### Networked Solution
The VCC lets you eliminate proprietary debit cards and migrate to an online account-based system that automatically tracks activity at all printers and copiers in a single database.

### Printing
Users can pick up their print jobs wherever they choose – in a different building, after class, on their way home. They simply identify themselves at the printer with their account number and once verified, the VCC displays a list of their jobs. The printing follows the user.

## Key Features

### Robust
The sturdy case, clear display and ergonomically designed keypad make the VCC ideal for public use.

### Flexible
The VCC works with all leading print vending software products on the market today.

### Convenient
One low-cost device controls copy and print output on most traditional and multi-function copiers. Color, Black & White and different media sizes can all be controlled with the VCC.

## Interfaces

- ABA Track 2 Card Swipe, Prox by HID or optional Mifare proximity card reader
- Barcode scanner
- 2 x 20 character display
- 16 character keypad with alphanumeric input
- 10 base T Ethernet connection
- Copier interface attaches to all major brands of copiers
