

MOBU ENTERPRISES CAPABILITY STATEMENT

SUMMARY

Mobu Enterprises is a Woman Owned business that began operations in 2018 as a green construction firm that builds residential and commercial structures out of shipping containers across the United States of America with some projects being procured overseas. Our goal is to enrich communities by providing sustainable housing and job opportunities in vulnerable communities. We began the "Mobu Enterprises Container Life Apprenticeship" as a means to demonstrate, to our locales, that we are committed to improving economic conditions by hiring locally. We recently revamped the business model that transitions us from site-built construction to modular-built construction. This gives us a competitive edge by allowing our plant-to-site production rates to triple by having a 24-hour manufacturing plant with a projected yield of 100 structures a month. We will also provide consulting services and white label opportunities for developers seeking to transition into green construction as an add-on service. We have several local and federal certifications making us competitive and available for partnerships with non-certified companies.

BUSINESS CAPABILITIES

WE SPECIALIZE IN THE FOLLOWING SERVICES:

- Single-Family Housing: New Construction, retrofit, and add on
- Multi-Family Housing: New Construction, retrofit, and add on
- Industrial: New Construction, retrofit, and add on
- Commercial: New Construction, retrofit, and add on
