Look fwd to your return call. I don't want make anyone look bad in all this... I want firefighter SAFETY at the end of a progressive hoselay to be "ESTABLISHED" once and for all

once and for all as the HIGHER PRIORITY of getting your passing numbers when the only important numbers are the ones to produce an effective fire stream every SAFE STEP until your apparatus is maxxed out up

is maxxed out up 1,500 ft sooner than your "IN-HOUSE" calculations deceptively train every eager but IGNORANT hopeful lieutenant and beyond to BELIEVE! Yeah!!! 1,500 ft. SHORT!!!

SHORT!!!

Have an awesome week. I truly appreciated your contact this morning.

BE SAFE!!! FIRE STREAM SAFE!!!

Thu, Nov 6, 08:26

You have no idea

Thu, Nov 6, 08:26

You have no idea how challenging my life has been since my children's mother had my kids felony abducted, felony imprisoned, and then she felony transported them over state lines when I was

them over state lines when I was at the NFPA conv. In Las Vegas meeting w the top Title 14 engineers and Underwriter's Lab re my PATENTED hose cabinet.

I want to work w you to produce the necessary

ERRONEOUS EXTRA 200 psi to do so when in fact the PROPER calculation respecting ALL TRUE laws of physics DEMANDS he/she STOP at 1,400 ft! You have reached your fire apparatus
